The Allixon International Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Allixon International Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Allixon International Corp. business.

About Allixon International Corp.

Allixon International Corporation, a professional development company, provides Radio frequency identification (RFID) Middleware and Mobile Internet solution for device computing.

The company combines its products and integration capability into solutions for various device computing applications, including RFID middleware and m-banking solution. Allixon's products based on ubiquitous technologies direct companies looking to tap into the wealth of data captured by networked devices, such as RFID readers or handhelds.

Products

The company's product offerings include Ubiquitous RFID Integration Solution (URIS); m-Banking Solution; and m-Stock Solution.

URIS: URIS, the RFID middleware, consists of three parts - RFID Multi-Adapter, Savant, and RFID Enterprise Middleware. RFID multi-adapter middleware consists of reader interface module and reader adapter module that make real-time data from RFID readers handled considering each characteristic product. Allixon has developed interfaces for RFID readers of Intermec, Matrics, and Alien Technology and interface

development for RFID readers of other companies is possible. Savant, as the central nervous system of the EPC Network and the core component of RFID middleware, filters real-time data from RFID readers and distributes real-time data shaped EPC (Electronic Product Code) to pointed computer systems enabling track products movement through EPC Network. RFID enterprise middleware integrates enterprise applications used many companies, and the interface development for enterprise applications of other companies is possible.

m-Banking Solution: The company's mobile banking service system based on WIPI (Wireless Internet Platform for Interoperability), has been developed for Korea Exchange Bank, Industrial Bank of Korea, Nonghyup, Chohung Bank, and Korea First Bank. Through this system the banks can provide services, such as - inquiring view of accounts, inquiring accounts transaction history, inquiring accounts transferring history, inquiring view of checks, inquiring exchange rate, transferring service, credit card service, and other additional services per bank.

m- chip banking service system - The company also offers mobile chip banking service system based on WIPI, which has been developed for Hana bank and SK Telecom. As the chip with embedded information and downloaded WIPI mobile banking application in a handset, banks can provide services, such as - general banking services, debit card, environment setting up, customer center, and MONETA.

m-Stock Solution: The company developed the m-stock system for Woori Investment & Securities.

Partners

The company has partnership with various businesses, such as National Computerization Agency, LG CNS, Samsung, POS DATA, SICC, Daewoo Information Systems, Shinsegae I&C, Fujitsu, KT Corp., Asiana IDT, EXE Consulting, SK Telecom, KTF Co., Ltd., and Wider Than.Com.; major hardware companies, such as Intermec, Hitrax, EXA E&C, Awid, and IDFuture; major software companies, such as IBM, Microsoft, Sun Microsystems, Inc., and Crosscert; associations, such as EPC Global, Ubiquitous, Kepia, Korea Association of RFD/USN, and Koita; and Universities, such as Information and Communications University, CBNU, Konkuk University, Hanyang University, Kyungwon University, and Korea Polytechnic University.

The company has signed an OEM Technology Agreement with Sun Microsystems, Inc. to acquire certain technologies available by Sun Microsystems, Inc. to build-out its RFID

Middleware Solution, more specifically with a focus in SCM (Supply Chain Management).

History

Allixon International Corporation was founded in 2003.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
