Abstracts

AltaGas Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between AltaGas Ltd. and its competitors. This provides our Clients with a clear understanding of AltaGas Ltd. position in the [Energy](#) Industry.

The report contains detailed information about AltaGas Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for AltaGas Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The AltaGas Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes AltaGas Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of AltaGas Ltd. business.

About AltaGas Ltd.

AltaGas Income Trust, an unincorporated open-ended investment trust, operates as an energy infrastructure and services company in Canada.

The company gathers, processes, and transports natural gas; extracts ethane and natural gas liquids (NGLs) from natural gas and transports NGLs; provides energy consulting and supply management services and arranges gas and power supply for non-residential end-users; and markets natural gas, NGLs and electrical power and generates power through the dispatch of gas-fired generating units.

Segments

As of December 31, 2008, the company had operations in four segments: Extraction and Transmission, Field Gathering and Processing, Energy Services, and Power Generation.

Extraction and Transmission segment

The Extraction and Transmission segment consists of AltaGas' interests in ethane and NGL extraction plants and natural gas and NGL transmission systems: Extraction plants process the natural gas to extract and recover ethane, NGLs, CO₂ and frac oil; and

Transmission pipelines deliver natural gas and NGLs to distribution systems, end-users or other downstream pipelines. AltaGas owns five natural gas transmission systems with transportation capacity of approximately 554 Mmcf/d and three NGL pipelines with combined capacity 151,600 Bbls/d.

Field Gathering and Processing segment

The Field Gathering and Processing segment includes natural gas gathering pipelines and processing facilities, as well as AltaGas' investments in businesses ancillary to the field gathering and processing business: gathering systems move natural gas from producing wells to processing facilities; and processing facilities remove impurities and certain hydrocarbon components from natural gas, in addition to compressing the gas to meet downstream pipelines' operating specifications for transportation. The Field Gathering and Processing segment consists of 76 gathering and processing facilities in 30 operating areas located in western Canada and approximately 6,500 km of gathering lines upstream of processing facilities that deliver natural gas into downstream pipeline systems that feed North American natural gas markets. AltaGas has a total gross licensed processing capacity of 1.2 Bcf/d, of which one-third is capable of processing sour gas capacity. AltaGas operates 73 of its 76 facilities.

Energy Services segment

The Energy Services segment consists of two main businesses: energy management services and gas services: The energy management business provides energy consulting and supply management services and arranges gas and power supply for non-residential end-users; and the gas services business buys and resells natural gas, transportation and storage. AltaGas has approximately 1,400 energy management and gas service contracts. These customers are commercial, industrial, agricultural and institutional end-users in Ontario, Alberta, British Columbia, Quebec, New Brunswick, Nova Scotia and Manitoba. The AltaGas energy management business arranges natural gas and electricity supply on behalf of its customers through an array of qualified suppliers, including AltaGas.

Power Generation segment

The Power Generation segment consists of AltaGas' interests in coal-fired base-load generation, an effective 25 percent interest in a 7-MW run-of-river hydroelectric project and gas-fired peaking capacity. The segment also includes the Bear Mountain Wind Park being constructed and other renewable energy projects that AltaGas is seeking to

develop. As of December 31, 2008, AltaGas had 392 MW of installed power capacity, comprised of 353 MW of power generation capacity through a 50 percent ownership interest in the Sundance B PPAs, a capital lease for 25 MW of gas-fired peaking capacity and another 14 MW of gas-fired peaking capacity. As of December 31, 2008, AltaGas' 392 MW of installed power capacity served approximately 5 percent of Alberta's power demand.

History

AltaGas Income Trust was founded in 1993.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
