Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Altran Technologies SA business.

About Altran Technologies SA

Altran Technologies S.A. provides consulting services. The company's services support throughout the life-cycle of a project or service.

The company's operating activities are divided into four geographical areas: France; northern region comprising Germany, Austria, the Benelux countries, Denmark, Ireland, Norway, the Eastern European Countries, Romania, the United Kingdom, Sweden, and Switzerland; southern region comprising Andorra, Brazil, Spain, Italy, Portugal, and Venezuela; and rest of the world comprising North America, Asia, and the Middle East.

Segments

The company's segments include Technology and Innovation Consulting, Organization and Information Systems Consulting, and Strategy and Management Consulting.

Technology and Innovation Consulting

The Technology and Innovation Consulting division comprises companies whose activity has to do with the design, development, industrialization, and production of

products and services. These companies offer personalized solutions to customers operating chiefly in the automotive, aerospace, defence, telecoms, and energy sectors.

The company's consultants in this unit work especially on international industrial projects dealing with problem areas, such as active vehicle security, air traffic control, space missions, third generation telephony, and energy.

Organisation and Information Systems Consulting

The purpose of the Organisation and Information Systems Consulting Unit is to group together all the activities concerned, so as to make global offers meeting the customers' performance requirements. The company's assistance covers the preliminary organization and information systems (IS) projects through to the more technical phases.

Strategy and Management Consulting

The Strategy and Management Consulting Unit consists of companies that work with customers' general management to define and implement their corporate strategy. Under the terms of a global contract, specialists from this unit work on international problem issues.

Joint Venture

Creation of Altran-Telnet joint venture: In July 2008, Altran and Telnet teamed up to form a 50/50 engineering services joint-venture company, based in Tunis and with an operating branch in Sfax. Telnet is a specialized engineering company developing embedded software, electronic design services, and mechanical CAD for the telecoms and multimedia, aeronautics and defence, automotive and transport, security and smart card, and manufacturing and automation fields.

History

Altran Technologies S.A. was founded in 1970.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
