The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Amerex Group, Inc business.

About Amerex Group, Inc

Amerex Group, Inc., through its subsidiaries, operates in the industrial and hazardous waste management services, and environmental remediation and abatement services industries primarily in south central the United States.

The company's industrial waste management services are conducted through Amerex Companies, Inc, an Oklahoma corporation and its wholly-owned subsidiary, Amerex, and Waste Express, Inc., a Missouri corporation and wholly-owned subsidiary of Amerex.

Services

The company's services consist primarily of collecting, treating, storing and ultimately disposing of their hazardous and industrial waste. Amerex also provides services to municipalities in managing collection days on which residents of the sponsoring municipality may bring their household hazardous waste such as paint, insect control chemicals, batteries, and light bulbs to staging areas which Amerex establishes. Amerex would then collect and sort the collected material and dispose of them properly. Amerex also provides emergency response services to industrial and municipal clients to mitigate or remove hazardous materials following motor vehicle accidents, industrial

mishaps, chemical spills and similar emergencies.

Transportation, treatment and disposal

The company transports, treats and disposes of wastes for commercial and industrial customers, health care providers, educational and research organizations, other waste management companies and governmental entities. The wastes handled include substances which are classified as 'hazardous' because of their corrosive, ignitable, infectious, reactive or toxic properties, and other substances subject to federal and state environmental regulation. Wastes are collected from customers and transported by the company to and between its facilities for treatment or bulking for shipment to final disposal locations. In providing this service, the company utilizes various specially designed and constructed tank trucks and semi-trailers, as well as other third-party transporters, including railroads.

Waste types processed or transferred in drummed or bulk quantities include: flammables, combustibles and other organics; acids and caustics; cyanides and sulfides; solids and sludge; industrial wastewaters; PCB materials and electrical light ballasts; medical waste; other regulated wastes; and non-hazardous industrial waste.

Disposal options include reclamation, fuels blending, incineration, aqueous treatment, and secure chemical landfills. Reclamation includes metal recycling, product replacement and recycling of various materials to remove impurities and conform to product specifications. Fuel blending consists of blending liquids and solids to form a burnable material as a replacement fuel to be used in permitted cement kiln operations. Incineration is the destruction of various toxic or hazardous materials to remove the hazardous properties in a permitted thermal unit. Aqueous treatment is the neutralization or fixation of characteristically hazardous materials. Secure chemical landfills includes both hazardous and non-hazardous permitted facilities placement of materials in lined and monitored landfills.

Field services

The company provides a range of environmental field services to maintain industrial facilities and process equipment, as well as up or contain actual or threatened releases of hazardous materials into the environment. These services are provided primarily to chemical, petroleum, transportation, utility, industrial and waste management companies, and to governmental agencies. Field services refers to the dispatching its personnel and equipment to a customer's site for the purpose of picking up their

hazardous and industrial waste and transporting it to its transfer facility. Field services is the initial transportation phase of its services and also consists of completing the requisite documentation consisting of manifests describing the material being removed, its state and quantity.

The company's field services also include property posting appropriate signage on a conspicuous location on the outside of the vehicle to comply with prevailing regulations, typically

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
