## Abstracts

American Defense Systems, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between American Defense Systems, Inc. and its competitors. This provides our Clients with a clear understanding of American Defense Systems, Inc. position in the [Aerospace and Defense](#) Industry.

The report contains detailed information about American Defense Systems, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for American Defense Systems, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The American Defense Systems, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes American Defense Systems, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of American Defense Systems, Inc. business.

### **About American Defense Systems, Inc.**

American Defense Systems, Inc. operates as a defense and security products company.

The company engages in three business areas, including customized transparent and opaque armor solutions for construction equipment and tactical and non-tactical transport vehicles used by the military; architectural hardening and perimeter defense, such as bullet and blast resistant transparent armor, walls and doors, as well as vehicle anti-ram barriers such as bollards, steel gates and steel wedges that deploy out of the ground; and tactical training products and services consisting of its live-fire interactive T2 Tactical Training System and its American Institute for Defense and Tactical Studies.

The company focuses primarily on research and development, design and engineering, fabrication and providing component integration. It markets multimedia and interactive digital solutions for use-of-force training of military, law enforcement, security and other personnel.

### **Products and Services**

The company offers various products and solutions incorporating its transparent and opaque armor solutions.

**Crew Protection Kits (CPKs):** The company designs, engineers, fabricates prototypes, integrates the production of, and delivers CPKs to customers or install completed CPKs on vehicles. Installation may occur domestically or abroad as specified by a contract's requirements. CPKs provide armor protection of operator compartments through the integration of opaque armor, transparent armor, specialized insulation, ingress/egress windows, combat locks and other specialized hardware, customized air conditioning units, customized windshield wipers, alternators and, for wheeled vehicles, improved tires.

**VistaSteel Transparent Armor:** VistaSteel transparent armor is a tough and resilient laminated glass that provides a defensive barrier to protect against firearms, physical attack, and explosive blasts. VistaSteel transparent armor is created through a process of bonding polycarbonate and glass under pressure and heat. The VistaSteel transparent armor product is sold in varying thicknesses depending on the type and level of defense required by the customer. The company can provide VistaSteel in spall or no-spall configurations as well as providing de-frosting and de-icing and films for architectural applications.

**VistaSteel Opaque Armor:** VistaSteel opaque armor is utilized in conjunction with VistaSteel transparent armor to form up-armor or add-on armor kits. A vehicle armor kit consists of full perimeter protection including front and rear vehicle armor, doors with operable and non-operable windows, windshields, rear windows, roof and undercarriage protection. These kits are engineered and installed on various military vehicles, including variations of the High Mobility Multipurpose Wheeled Vehicle (HMMWV's).

**Lightweight Armor Systems:** The company offers solutions to maintain the ballistic protection. The new system is a scalable solution that permits 'normal' operation at a reduced armor weight with an upgradeable add-on for high threat operations.

**VistaGuard Windows:** VistaGuard windows are Forced Entry Blast Resistant (FEBR) windows, window frames and transparent armor assemblies used to mitigate forced entry, ballistic and terrorist threats in high visibility targets.

**Forced Entry Blast Resistant Curtain Wall:** A full scale (approximately 6 x 8) FEBR window and frame has been constructed for potential use in the U.S. embassies and other federal facilities worldwide.

Portable Transparent Ballistic Shield (PTBS): The company has responded to interest by police agencies, correctional agencies and other security agencies for a bullet-resistant, transparent mobile shield for use as a protection device in hostage negotiation and other hostile situations. PTBSs have been sold to law enforcement agencies in New York, the U.S. Department of Veterans Affairs, and overseas clients.

Trans-Barrier System: The company has developed a transparent armor shield to mount to the top of existing Jersey Barriers to provide ballistic and blast protection while maintaining openness and visibility to a location or facility requiring enhanced a

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
