Abstracts

American International Industries Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between American International Industries Inc. and its competitors. This provides our Clients with a clear understanding of American International Industries Inc. position in the [Conglomerates](#) Industry.

The report contains detailed information about American International Industries Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for American International Industries Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The American International Industries Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes American International Industries Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of American International Industries Inc. business.

About American International Industries Inc.

American International Industries, Inc. operates as a diversified holding company. The company has interests in industrial companies, oil and gas interests, oilfield supplies and services companies, and interests in undeveloped real estate in the Galveston Bay, Texas area.

Segments

The company operates through three segments, including Northeastern Plastics, Inc. (NPI), Shumate Energy Technologies, Inc. (SET), and Delta Seaboard Well Services, Inc. (Delta).

Northeastern Plastics, Inc.

Northeastern Plastics, Inc., a wholly owned subsidiary, is a supplier of automotive after-market products and consumer durable goods products to retailers and wholesalers in the automotive after-market and in the consumer durable electrical products markets.

Products and Services: NPI markets its diversified product assortment under the Good Choice and MOTOR TREND brand names. The NPI MOTOR TREND branded products include various booster cables, portable and rechargeable hand lamps, lighting products, cord sets, and miscellaneous battery and other consumer automotive accessories. The NPI MOTOR TREND program is supported through a national advertising campaign in MOTOR TREND, Truck Trend, and Automobile magazines.

The NPI Good Choice product assortment includes various portable lighting products, cord sets, residential household light bulbs, night lights, multiple outlet devices and other consumer products. NPI products are available at stores, such as Family Dollar, Dollar Tree, H.E.B., Dollar General, Freds, Big Lots, Bi-Mart, and Publix. NPI markets its products through such major chains as Family Dollar, Dollar Tree, Big Lots, Ocean State Jobbers, H.E.B., Freds, Publix, Bi-Mart, and Dollar General.

Competition: NPI's primary competitors in the safety products market include Coleman Cable Company and East Penn. NPI's primary competitors in the consumer durables market include Coleman Cable, General Electric (via a licensee), and American Tac.

Shumate Energy Technologies, Inc.

Shumate Energy Technologies, Inc. (SET), a wholly owned subsidiary, manufactures, focuses in the energy field services market. SET manufactures products, parts, components, and assemblies for its customers designed to their specifications. SET provides 3-D modeling software, computer numeric-controlled, or CNC, machinery and manufacturing expertise to its customers' research and development, engineering, and manufacturing departments. SET's customers include, without limitation, Baker Hughes, Canrig Drilling Technology, a Nabors Industries company, FMC Technologies, Halliburton Energy Services, National Oil Well Varco, Oceaneering Intervention Engineering, Shell Development, Smith International, and Weatherford International.

SET manufactures products, spare parts, and assemblies for the oil & gas field services market segment. SET manufactures products, spare parts, and assemblies for the oil & gas field services market segment.

Products and Services: The line of products SET manufactures includes expandable tubular products, including liner hangers, launchers and sand screens for energy field service applications; top drive assemblies, sub-assemblies and spare service parts; measurement while drilling (MWD) products; directional drilling products; completion tools; exploration products for research and development; natural gas measurement

equipment, including fittings and valves; power frames for centrifugal pumps and mud motors; and sub-sea control equipment.

SET produces assemblies, including expandable tubing technology products that are used in field service operations under extreme environmental conditions for oil and gas exploration.

SET's customers include Baker Hughes, Canrig Drilling Technology, a Nabors Industries company, Enventure Global Technologies, FMC Technologies, Halliburton Energy Services, National Oil Well Varco, Oceaneering Intervention Engineering, Shell Development, Smith International, and Weatherford International.

Delta Seaboard Well Service, Inc.

Delta Seaboard Well Services (Delta), a 51% owned subsidiary, is an onshore rig-based well-servicing contracting company providing services to the oil and gas industry. Delta's well site services provide a range of products and services that are used by oil companies and independent oil and natural gas companies operating in South and East Texas, and the Gulf Coast market. Delta's services include workover services, plugging and abandonment, and well completion and recompletion services.

Workover Services: Delta provides workover products and services primarily to customers in the U.S. Gulf Coast market.

Delta's Competition: In its markets, principally in South and East Texas, and the Gulf Coast, Delta competes principally with Tetra Applied Technologies and Five J.A.B.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
