Abstracts

American Lorain Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between American Lorain Corporation and its competitors. This provides our Clients with a clear understanding of American Lorain Corporation position in the [Food and Beverages](#) Industry.

The report contains detailed information about American Lorain Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for American Lorain Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The American Lorain Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes American Lorain Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of American Lorain Corporation business.

About American Lorain Corporation

American Lorain Corporation operates as a food manufacturing company in China. The company develops, manufacture, and sells the following types of food products: chestnut products, convenience foods (including ready-to-cook, or RTC, foods, ready-to-eat, or RTE, foods and meals ready-to-eat, or MRE); and frozen food products.

The company's products are sold in 26 provinces and administrative regions in China and 42 foreign countries. It has limited sales and marketing activity in the United States.

Products

The company's products are categorized into the following three segments: Chestnut products, Convenience food products, and Frozen food products.

Chestnut Products

The company's products in 2009 included its aerated open-bottom chestnuts, which are chestnuts packaged with nitrogen; sweetheart chestnuts, which are sweet preserved chestnuts; chestnuts in syrup; and golden chestnut kernels. The majority of its chestnut

products are natural and do not contain chemical additives.

Convenience Foods

The company's convenience food products are characterized as follows: Ready-to-cook, or RTC, food products; Ready-to-eat, or RTE, food products; and Meals ready-to-eat, or MRE, food products. RTCs can be served after a few easy cooking procedures. Typically, when preparing a RTC, customers need only to heat the food in a microwave or boil it for several minutes before eating. The company's RTCs in 2009 were beef and lamb products.

RTEs can be served without any cooking. The company's main RTEs in 2009 were various pickle products. Other RTEs include spiced belt fish, cherry tomato, spicy pork fillet, pork and egg roll, pears and pineapples.

MREs are meal kits with self-heating devices. The company's MREs are used in both military and civilian uses, such as camping, traveling and other situations in which a person does not have access to traditional cooking supplies and equipment, such as a stove or microwave. In 2009, the company also introduced to market new MRE products that are microwaveable and used by people who do not have time or means to cook or to eat at a restaurant.

The company produces various MREs based on Chinese cuisine, which were its pork with garlic sauce over rice and kungpao chicken with rice. Other MREs are based on other styles of food, such as Italian cuisine. Many of its convenience products are natural and do not contain chemical additives.

The company produced 117 convenience food products in 2009, including 16 new products, such as candied bean products and MRE microwaveable rice products.

Frozen Food Products

The company produces various frozen foods, including frozen vegetables, frozen fruits, frozen fish, and frozen meats. The company produced 61 frozen food products in 2009. The company's main frozen foods in 2009 were frozen asparagus and frozen corn.

Sales and Marketing

The company has 36 sales offices in 26 provinces in China. Its export sales destinations

include Asia, primarily Japan, South Korea and Malaysia, but also Singapore and Taiwan; Europe, primarily Belgium and the United Kingdom, but also France, Germany, the Netherlands, Spain, and Sweden; the Middle East, primarily Saudi Arabia, Kuwait and the United Arab Emirates; and North America, including the United States and Canada. The company sells products to international markets through Shandong Lvan, a food trading company in China, other export companies in China, and its own sales team located in China.

Customers

The company sells products in 26 provinces and administrative regions in China and 42 foreign countries globally. Its major customers are Shandong Lvan Import & Export Co., Ltd., a food trading company in China that distributes a significant portion of the company's exported products; and Shinsei Foods, a Japanese company.

Competition

The company's competitors in the chestnut product market are Hebei Liyun, a Chinese company, and Foodwell Corporation, a South Korean company. Its competitors in the frozen food products market are Weitang Langdong, Yuyao Hongji Food Co. Ltd. and Yantai Pengshun Food Co. Ltd.

History

American Lorain Corporation was founded in 1995.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
