Abstracts

American Software, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between American Software, Inc. and its competitors. This provides our Clients with a clear understanding of American Software, Inc. position in the [Software and Technology Services](#) Industry.

The report contains detailed information about American Software, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for American Software, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The American Software, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes American Software, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of American Software, Inc. business.

About American Software, Inc.

American Software, Inc. engages in the development, marketing, and support of a portfolio of software and services that deliver enterprise management and collaborative supply chain solutions to the global marketplace. The company's software and services are designed to bring business value to enterprises by supporting their operations over intranets, extranets, client/servers, or the Internet.

Segments

The company provides software solutions through three business segments: Supply Chain Management (SCM), Enterprise Resource Planning (ERP), and Information Technology (IT) Consulting.

SUPPLY CHAIN MANAGEMENT SEGMENT

The SCM segment consists of Logility, Inc. (Logility), which provides collaborative supply chain solutions, an integrated set of supply chain planning, inventory optimization, manufacturing, and transportation and logistics solutions. Logility provides SCM solutions to streamline and optimize the market planning, management, production, and distribution of products for manufacturers, suppliers, distributors, and

retailers. As of April 30, 2010, Logility's customer base was approximately 1,250 companies located in approximately 74 countries.

Logility markets and sells the Demand Solutions product line to the global small and midsize enterprise (SME) market through the global VAR distribution network of Demand Management, Inc. (DMI). Logility offers the Logility Voyager Solutions suite through both direct and indirect sales channels to upper-midsize to fortune 1000 companies with distribution-intensive supply chains.

In March 2010, Logility acquired certain assets of privately-held Optiant, Inc. (Optiant), a Boston-based provider of multi-echelon supply chain optimization systems. Optiant has helped transform supply chains for various companies, including Black & Decker, Procter & Gamble, Kraft, HP, Nestle, and Boston Scientific.

Logility Voyager Solutions is a supply chain solution marketed to midsize, large, and fortune 1000 companies in the consumer goods, life sciences, process manufacturing, discrete manufacturing, wholesale distribution, and high-tech industries. Like other components in Logility's suite, Voyager Inventory Optimization can be deployed as a stand-alone solution or as a part of a broader supply chain initiative.

Logility Products and Services

Logility provides two product suites, Logility Voyager Solutions and Demand Solutions, marketed, sold and distributed through both direct and indirect sales channels. The Logility Voyager Solutions suite of products features performance monitoring capabilities and provides supply chain visibility; demand, inventory and replenishment planning; sales and operations planning (S&OP), supply and inventory optimization; manufacturing planning and scheduling; transportation planning and management; and warehouse management. The Demand Solutions product suite provides forecasting, demand planning, replenishment and point-of-sale analysis for improving profits for small to midsize manufacturing, distribution and retail operations.

Logility has licensed one or more modules of Logility Voyager Solutions or Demand Solutions to companies worldwide, including A.O. Smith, Abbott Diabetes Care, Alberto Culver, Armour Eckrich, Augusta Sportswear, Avery Dennison Corporation, Berry Plastics Corporation, Continental Mills, Electrolux, Farnell InOne, Fastenal Company, Huhtamaki, Jarden Corporation, Johnstone Supply, Kraft, L'Oreal, Malt-O-Meal Company, New Balance, Pernod-Ricard, Pfizer, Porsche, Procter & Gamble, Remington Products Company, Rexnord, Shaw Industries, Shiseido Americas, Sigma Aldrich,

Starbucks China, Trek Bicycle, Verizon Wireless, Warnaco, and VF Corporation.

Product Features: Logility Voyager Solutions

Logility Voyager Solutions is an integrated software suite that provides advanced SCM, including collaborative planning, strategic network design, multi-echelon inventory optimization, optimized supply sourcing, production management, warehouse management, and collaborative logistics capabilities. Logility Voyager Solutions incorporates performance management analytics to drive decision support for critical processes, such

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
