The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of AmeriResource Technologies Inc. business.

### **About AmeriResource Technologies Inc.**

AmeriResource Technologies, Inc., through its subsidiaries, involves in software development for the fast-food and full service restaurant industry. The company's wholly owned and majority owned subsidiaries are involved in software development for the fast-food and full service restaurant industry, a commercial liquidator for some of the retailers for their excess inventory, overstocks, and returned merchandise selling the products on eBay.

#### Subsidiaries

The company's subsidiaries include RoboServer Systems Corp., Net2Auction Corporation, AuctionWagon Inc., Auction Boulevard, Inc., BizAuctions, Inc., and Eaglerider De Cancun/449/ WDHQ.

Roboserver Systems Corp.: The company owns approximately 99% of the RoboServer. RoboServer is developing self-serve kiosk application and point of sale (POS) technologies. RoboServer has installed two of its pilot self-serve units in two different fast-food franchisees, with the first installation at Angelo's Burgers in Encinitas and the second installation at Dairy Queen in Oceanside.

RoboServer created two new divisions, iOrder and LineBuster during 2007 to facilitate the software programming and manufacturing of the hardware or kiosks whether free standing, wall mounted, or counter-top. iOrder provides interactive self-service ordering software for the restaurant and fast-food industry, and develops custom interfaces and systems for a variety of specialized kiosk applications. iOrder offers software for the following industries; restaurants, payment systems, theater, sports and entertainment ticketing, and informational systems. LineBuster is the division that provides the kiosk solutions or the hardware which is configured to handle restaurant, theatre, financial and informational applications.

AuctionWagon, Inc.: AuctionWagon is engaged in the business of providing software design and product development for businesses that are in the business of selling on eBay. AuctionWagon markets its consignment software to drop-off stores, and maintains a national affiliate network of drop-off locations. AuctionWagon's software, Store Manager Pro G2, performs various functions needed by an eBay consignment store, from printing contracts, barcodes, and inventory labels to managing its inventory, payment, shipping, check writing, and integrating photo editing.

Auction Boulevard, Inc.: Auction Boulevard conducts sales on eBay for customers who drop-off items at Auction Boulevard's place of business.

Bizauctions, Inc.: BizAuctions, Inc. provides commercial eBay liquidation services for excess inventory, overstock items, and merchandise that has been returned to the retailer.

Eaglerider De Cancun/449/ WDHQ: 449 Corporation and WDHQ Corporation operates EagleRider De Cancun franchises, which provides for the rental of Harley Davidson motorcycles and recreational equipment.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
