Abstracts

Amgen Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Amgen Inc. and its competitors. This provides our Clients with a clear understanding of Amgen Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Amgen Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Amgen Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Amgen Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Amgen Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Amgen Inc. business.

About Amgen Inc.

FY 2016 was a positive year for Amgen Inc.: its revenue increased by 6.14% to USD 22,991.0 billion compared to the previous year. Company's gross profit also grew from USD 17,487.0 million in 2015 to USD 18,829.0 million in 2016. Company's operating income rose by 13.94% to USD 9,832.0 million against FY 2015 as well as net income which rose up to USD 7,722.0 million.

Amgen, Inc., a biotechnology company, discovers, develops, manufactures, and markets human therapeutics based on advances in cellular and molecular biology.

Products

The company markets primarily recombinant protein therapeutics in supportive cancer care, nephrology, and inflammation. The company's principal products are: Aranesp (darbepoetin alfa) and EPOGEN (Epoetin alfa), erythropoietic-stimulating agents (ESAs) that stimulate the production of red blood cells; Neulasta (pegfilgrastim), a pegylated protein, based on the Filgrastim molecule, and NEUPOGEN (Filgrastim), a recombinant-methionyl human granulocyte colony-stimulating factor (G-CSF), both of which selectively stimulate the production of neutrophils (a type of white blood cell that helps the body fight infection), and Enbrel (etanercept), an inhibitor of tumor necrosis factor (TNF), a substance that plays a role in the body's response to inflammatory diseases.

The company's other marketed products include Sensipar/Mimpara (cinacalcet), a small molecule calcimimetic that lowers serum calcium levels; Vectibix (panitumumab), a fully human monoclonal antibody that binds specifically to the epidermal growth factor receptor (EGFr) and Nplate (romiplostim), a thrombopoietin (TPO) receptor agonist that mimics endogenous TPO, the primary driver of platelet production.

In addition to its marketed products, the company has products in mid-to-late stage development in various therapeutic areas, including oncology, hematology, inflammation, bone, nephrology, and general medicine, which includes cardiology and neurology. Denosumab, its late-stage product candidate, is a fully human monoclonal antibody that specifically targets a ligand known as RANKL (that binds to a receptor known as RANK), an essential regulator of osteoclasts (the cells that break down bone) that is under regulatory review and is being studied across a range of conditions.

Aranesp (darbepoetin alfa)

Aranesp is a protein that stimulates red blood cell production. Red blood cells transport oxygen to all cells of the body.

The company was granted an exclusive license by Kirin-Amgen, Inc. (KA), a joint venture between Kirin Holdings Company, Limited (Kirin) and Amgen, to manufacture and markets Aranesp in the United States, all European countries, Canada, Australia, New Zealand, Mexico, all Central and South American countries and certain countries in Central Asia, Africa, and the Middle East.

The company markets Aranesp primarily in the United States and Europe. Aranesp was launched in the United States and Europe for the treatment of anemia associated with CRF (both in patients on dialysis and patients not on dialysis) and is also indicated for the treatment of anemia due to concomitant chemotherapy in patients with non-myeloid malignancies.

EPOGEN (Epoetin alfa)

EPOGEN is a protein that stimulates red blood cell production. A reduced red blood cell count can result in anemia.

The company was granted an exclusive license to manufacture and market EPOGEN in the United States under a licensing agreement with KA. The company has retained

exclusive rights to market EPOGEN in the United States for dialysis patients. The company granted Ortho Pharmaceutical Corporation, a subsidiary of J&J (which has assigned its rights under the Product License Agreement to Centocor Ortho Biotech Products), a license to commercialize recombinant human erythropoietin as a human therapeutic in the United States in all markets other than dialysis.

The company launched EPOGEN in the United States for the treatment of anemia associated with CRF for patients who are on dialysis. The company markets EPOGEN in the United States for the treatment of anemic adult and pediatric patients with CRF who are on dialysis.

Neulasta (pegfilgrastim)/NEUPOGEN (Filgrastim)

Neulasta is used for a pegylated protein, based on the Filgrastim molecule that selectively stimulates production of certain white blood cells known as neutrophils. Neutrophils defend against infection. NEUPOGEN is recombinant-methionyl human G-CSF, a protein that selectively stimulates production of neutrophils. Myelosuppressive chemothera

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
