The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Amplifon SpA business.

## **About Amplifon SpA**

Amplifon SpA engages in the distribution and customization of fitting of hearing aids for the solution of problems related to the loss of hearing and the supply of related services. Amplifit engages in the diagnosis of hearing problems and in the application of hearing-aids with the collaboration of university centers in Europe and the United States.

The company operates through a network of retail outlets and network affiliates, which include 2.200 outlets, 3.000 authorized distribution centers and approximately 2.100 licensed network affiliates. The company operates in Italy, U.S.A., Canada, France, Holland, Switzerland, Spain, Portugal, Hungary, and Egypt.

### **Hearing-aids**

The company's hearing-aid products re-establish a hearing sensitivity as close as possible to normal, enabling the hypoacusis person to hear and understand speech and conversations. The company has four big families of hearing-aids, based on position: behind the ear, in the ear, glasses, and case. From a technological standpoint, the main differences consist in the circuits used to process the signal. Sound is amplified through three types of electronic circuits: analogue, programmable, and digital.

## Hearing accessories

Amplifon offers a line of accessories for communicating, hearing and better everyday living, at home or at work. These products are suitable for persons with hearing problems, but also for those with good hearing but with specific needs.

## Cochlear Implant Systems

The Cochlear Implant is a device designed to electrically stimulate the cochlea, able to replace the function of the cochlear hair cells and convert the sound into electrical pulses, which directly stimulate the acoustic nerve in order to produce hearing at the level of the cortical areas in patients with total or profound deafness.

The cochlear implants are designed and developed to help children and adults suffering from sensorineural hearing loss or 'missing' acoustic nerve.

## Implantable hearing-aids

Implantable hearing-aids represent a new development in medical electronics technology. Implantable Hearing-Aids allow persons in good health, and with neurosensory hearing loss, to improve their hearing capacity. Its implantable hearing-aids convert the sound into vibrations inside the middle ear. These vibrations are amplified by the electronics of the device to make them louder than those the patient would normally receive with sound waves transmitted through the auditory canal and the eardrum.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
