The Amsterdam Commodities NV financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Amsterdam Commodities NV competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Amsterdam Commodities NV business.

About Amsterdam Commodities NV

Amsterdam Commodities N.V. (Acom or the company) was formed in 1856. Acom is an international group with its principal business in the trade and distribution of agricultural products. The Company's main trading subsidiaries are Catz International B.V. in Rotterdam (100%, spices and food raw materials) and RCMA Commodities Asia (Pte) Ltd., Singapore (43%, natural rubber). ACOMO also owns and operates a rubber plantation in Liberia. ACOMO is permanently involved in the intermediate stages of transportation, processing, storage, technical analysis, trade finance and distribution.

The Company's customers are both the producers in mainly tropical countries (plantations, farmers, cooperations) and industrial consumers of agricultural commodities (spice mills, industrial bakeries, tyre manufacturers).

Catz International B.V.

Catz International is a Dutch trading house with roots dating back to 1856. Catz joined ACOMO in 1982 and has become one of its most important company, trading and distributing a specialised range of over 100 food products including spices, dessicated coconut, nuts, dried fruits and dehydrated vegetables.

Products

Spices

Spices include pepper, nutmeg, mace, cloves, cardamon, cassia, cinnamon, dried ginger, chillies, piment and turmeric.

Aromatic seeds

Aromatic seeds include celery, coriander, fennel, caraway, cumin, mustard, poppy and sesame.

Herbs

Herbs include oregano, thyme, rosemarin, basil, medical herbs and laure leaves.

Nuts & kernels

Nuts & kernels include almonds, apricot kernels, brasil-nuts, cashew kernels, hazelnuts, pecan nuts, peach kernels, pistachio nuts, walnuts, peanuts, pinetree kernels and macadamia nuts.

Tropical produce

Tropical produce include coconut chips, desiccated coconut and coconut milk powder.

Dehydrated vegetables

Dehydrated vegetables include paprika powder, garlic powder, garlic granules and onion powder.

Dried fruits

Dried fruits include apples, apricots, currants, dates, mixed fruit, raisins, peaches, pears and prunes.

RCMA Commodities Asia

RCMA Commodities Asia in Singapore is the joint venture between L. Wurfbain & Co. B.V. (1897-Zaandam, the Netherlands) and the Singapore rubber trader TongTeik (Pte) Ltd. Merged in 1998, the company specialises in around the clock marketing and distribution of natural rubber, latex and synthetic rubber. RCMA services its customers worldwide with offices in Singapore, Zaandam (The Netherlands), Hamburg (Germany) and Norfolk (USA). Acomo holds a 43% participation in RCMA Commodities Asia, together with Singapore Tong Teik (43%) and Nordmann Rasmann Chemicals GmbH (14%).

Products

Technical specified rubber (TSR)

Latex: low ammonia, pre-vulcanized, creamed Synthetic rubbers like Butyl and Sbr rubbers

Main customers

Rubber is a technical commodity and there are many different specifications and origins. Customers include all the large tyre manufacturers and also serve many other industrial rubber consumers in the pharmaceutical industry, shoe industry, rubber foam industry (mattresses), tape and dipped rubber products (gloves, balloons).

Salala Rubber Corp.

Salala Rubber Corporation is a rubber plantation located in the centre of the Liberian rubber belt, not very distant from Monrovia. After having obtained concession rights on 8,500 ha of virgin land in 1961, Amsterdam Rubber developed a successful rubber plantation covering 2,600 ha representing a normalized annual dry rubber production capacity of 3,500 tons.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
