In the part that describes The Andersons, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of The Andersons, Inc. business.

About The Andersons, Inc.

The Andersons, Inc. operates in the agriculture and transportation markets. The company focuses on grain risk management, bulk handling, transportation and logistics, and commodity markets.

Segments

The company's segments include Grain & Ethanol Group, Rail Group, Plant Nutrient Group, Turf & Specialty Group, and Retail Group.

Grain & Ethanol Group

This segment operates grain elevators in Ohio, Michigan, Indiana and Illinois. The principal grains sold by the company are yellow corn, yellow soybeans and soft red and white wheat. In addition to storage and merchandising, the company performs trading, risk management and other services for its customers. As of December 31, 2009, the company's grain storage practical capacity was approximately 101 million bushels, which includes grain storage through warehouse and handling agreements and storage that is leased out to two ethanol production facilities. The company is also the developer

and significant investor in three ethanol facilities located in Indiana, Michigan and Ohio. In addition to its equity investment, the company operates the facilities under management contracts, provides grain origination, ethanol and distillers dried grains (DDG) marketing and risk management services to these joint ventures for which it is compensated separately.

Grain merchandised by the company is grown in the midwestern portion of the United States (the eastern corn-belt) and is acquired from country elevators (grain elevators located in a rural area, served primarily by trucks (inbound and outbound) and rail (outbound)), dealers and producers. The company makes grain purchases at prices referenced to Chicago Mercantile Exchange (CME).

Rail Group

This segment buys, sells, leases, rebuilds and repairs various types of used railcars and rail equipment. It also provides fleet management services to fleet owners and operates a custom steel fabrication business. The company generally holds purchase options on most railcars owned by financial intermediaries. It is under contract to provide maintenance services for approximately 13,000 of the railcars that the company owns or manages. It has a diversified fleet of car types (boxcars, gondolas, covered and open top hoppers, tank cars and pressure differential cars) and locomotives serving a diversified customer base. The company operates in the used car market – purchasing used cars and repairing and refurbishing them for specific markets and customers.

Plant Nutrient Group

This segment purchases, stores, formulates, manufactures, and sells dry and liquid fertilizer to dealers and farmers; provides warehousing and services to manufacturers and customers; formulates liquid anti-icers and deicers for use on roads and runways; and distributes seeds and various farm supplies. The company has developed various other products for use in industrial applications within the energy and paper industries. The major fertilizer ingredients sold by the company are nitrogen, phosphate and potash.

The company's market area for its plant nutrient wholesale business includes major agricultural states in the Midwest, North Atlantic and South. In 2009, the company acquired the assets of the Fertilizer Division of Hartung Brothers, Inc. (HBI), a regional wholesale supplier of liquid fertilizers with six facilities located in Wisconsin and Minnesota.

Customers for the company's fertilizer products are principally retail dealers. Sales of agricultural fertilizer products are heaviest in the spring and fall. The Plant Nutrient Group has farm centers located throughout Michigan, Indiana, Ohio and Florida, within the same regions as the company's other primary agricultural facilities. These farm centers offer agricultural fertilizer, chemicals, seeds, supplies and custom application of fertilizer to the farmer. The company reserves 6.8 million cubic feet of its dry storage capacity for various fertilizer manufacturers and customers and 28.5 million gallons of its liquid fertilizer capacity is reserved for manufacturers and customers.

Turf & Specialty Group

This segment produces granular fertilizer products for the professional lawn care and golf course markets. It also produces private label fertilizer and corncob-based animal bedding and cat litter for the consumer markets.

Professional turf products are sold both directly and through distributors to golf courses under The Andersons Golf Products label and lawn service applicators. The company also sells consumer fertilizer and control products for do-it-yourself application, to mass merchandisers, small independent retailers and other lawn fertilizer manufacturers and performs contract manufacturing of fertilizer and control products. During the off-season, the company sells ice melt products to many of the same customers that purchase consumer turf products.

Retail Group

This segment includes large retail stores operated as The Andersons, which are located in the Columbus and Toledo, Ohio markets and serve urban, suburban and rural customers. The company also operates a specialty food store operated as The Andersons Market located in the Toledo, Ohio market area. The retail concept is More for Your Home and the stores focus on providing significant product breadth with offerings in home improvement and other mass merchandise categories, as well as specialty foods, wine and indoor and outdoor garden centers.

History

The Andersons, Inc. was founded in 1947.

The above Company Fundamental Report is a half-ready report and contents are

subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
