The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Anglo Platinum Ltd. business.

About Anglo Platinum Ltd.

Anglo Platinum Limited engages in the exploration and development of mineral properties in South Africa.

The company's mining, smelting and refining operations are situated in the North West and Limpopo Provinces of South Africa. It produces platinum group metals (PGMs) in quantities determined by their occurrence in the ore mined. The PGMs are platinum, palladium, rhodium, ruthenium, iridium and osmium.

The main North West mining operations include Khomanani Mine, Bathopele Mine, Siphumelele Mine, Thembelani Mine, Khuseleka Mine, Tumela Mine, Dishaba Mine and Union Section (85% owned). The main operating mines in Limpopo include Mogalakwena Section, Twickenham Mine and Lebowa Platinum Mines Limited (LPM).

Joint Ventures

The company's smelting and refining operations are wholly owned, treating concentrate and matte from its wholly owned operations and its joint ventures and subsidiaries. The company, in Zimbabwe, is in the process of developing the Unki Platinum Mine and in Canada, Russia, Brazil and China it is involved in exploration.

Modikwa: The company and ARM Mining Consortium Limited have established a 50:50 jointly controlled operation, known as the Modikwa Platinum Mine Joint Venture (Modikwa). Modikwa operates a mine and a processing plant on the Eastern Limb of the Bushveld Complex.

Kroondal: The company and Aquarius Platinum (South Africa) (Proprietary) Limited (Aquarius) have pooled certain mineral rights and infrastructure. The two parties share 50:50 in the profits from the jointly controlled mine, which is managed by Aquarius.

Marikana: The company and Aquarius have pooled certain mineral rights and infrastructure. The two parties share 50:50 in the profits from the jointly controlled mine, which is managed by Aquarius.

Bafokeng-Rasimone Platinum Mine (BRPM) Joint Venture: The company and Royal Bafokeng Resources (Proprietary) Limited (RBR) have entered into a 50:50 joint venture. In terms of the agreement, the Group contributed the operating Bafokeng Rasimone Platinum Mine and the related mineral rights to the venture, while RBR contributed certain mineral rights.

Mototolo Joint Venture: The company and Xstrata Kagiso Platinum Partnership have entered into a 50:50 joint venture. In terms of the agreement, each party has contributed a similar amount of in situ PGM reserves and resources, from Xstrata's Thorncliffe farm, adjacent to its Thorncliffe chrome mine and the company's bordering farm, part of its Der Brochen project area.

History

Anglo Platinum Limited was incorporated in 1946.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
