The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Antrim Energy Inc. business.

About Antrim Energy Inc.

Antrim Energy Inc. engages in the acquisition, exploration, development, and production of oil and natural gas. Antrim's properties are located in Argentina and the United Kingdom. The company's portfolio of assets includes exploitation, exploration, and development opportunities in Argentina and exploration and development opportunities in the United Kingdom.

Argentina

Tierra del Fuego: The company holds a 25.78% working interest in three concessions in southern Argentina. The Rio Cullen, Angostura and Las Violetas concessions cover an area of approximately 490,000 acres, (126,322 net acres to Antrim). Each concession extends three kilometers offshore with their eastern boundaries paralleling the coastline. The concessions produce oil, gas and NGL.

Puesto Guardian: The company holds a 40% working interest in the Puesto Guardian Concession situated in the northwest basin in northern Argentina, in the Province of Salta. The Puesto Guardian Concession covers an area of approximately 155,700 acres and produces oil from four fields: Puesto Guardian, Cañada Grande, Pozo Escondido (which includes Pozo Escondido Este) and Dos Puntitas.

Medianera: The company, in 2006, acquired a 70% working interest in the Medianera Block located in central Argentina in the Neuquen Basin. The Medianera Block covers an area of approximately 13,000 acres and produces oil from the Medianera field.

United Kingdom

The company's activities in the United Kingdom are concentrated in the North Sea and Northern Ireland.

North Sea UKCS Block 211/22a Southeast Area and North Sea UKCS Block 211/23d – Causeway: Under an agreement to farm out a portion of its interest in Block 211/22a Northeast Area, the company increased its working interest in the southeast portion of Block 211/22a to 79%. This portion of the block included the prospective Osprey Ridge area situated in the East Shetland Basin of the North Sea.

North Sea UKCS Block 21/28a – Fyne and Dandy: In November 2006, the company acquired a 75% working interest in Block 21/28a in the Central North Sea. The block contains the Fyne and Dandy oil fields. In March 2008, drilling commenced on the Fyne field. The company completed drilling operations on the Antrim-operated well 21/28a-9 on the Central Fyne field in the U.K. Central North Sea in April 2008.

South Larne, Northern Ireland

In Northern Ireland, the company has a one-third interest in a Petroleum Prospecting Licence (PPL) designated PL 1/01 and a Minerals Prospecting Licence (MPL) designated AR 01/08.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
