## Abstracts

Anvil Mining Limited Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Anvil Mining Limited and its competitors. This provides our Clients with a clear understanding of Anvil Mining Limited position in the [Metals and Mining](#) Industry.

The report contains detailed information about Anvil Mining Limited that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Anvil Mining Limited. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Anvil Mining Limited financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Anvil Mining Limited competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Anvil Mining Limited business.

### **About Anvil Mining Limited**

Anvil Mining Limited engages in the acquisition, exploration, development, and mining of copper and precious metals in Africa, southeast Asia and Australia. Its principal asset is a 90% interest in the copper-silver mine (the Dikulushi Mine) situated in the Democratic Republic of Congo (DRC), which at December 31, 2004 was in commercial production and completed the Stage II expansion of its processing facilities in October 2004. Anvil also holds interests in other exploration properties in the DRC, Zambia and South East Asia. As of September 30, 2003, the open pit mine had a reserve of 1,138,000 tones of ore grading an average 8.11% copper and 238 g/t silver.

The operations in DRC comprise the Dikulushi copper-silver mine, as well as exploration on tenements, totaling almost 20,000 square kilometers, held in DRC. The Zambia operations comprise the infrastructure support to the Dikulushi mine, as well as 2,900 square kilometers of exploration tenements. The Ghana assets include the company's investment in GSR. The Vietnam and Philippine operations are mainly exploration projects.

In 2004, the company acquired a 70% beneficial interest in the Mutoshi Copper-Cobalt Project in the Kolwezi region in DRC. The Mutoshi Project includes the Mutoshi Mine, the Kulumaziba coarse rejects/tailings deposit, the Mutoshi Northwest Deposit, the

Noika Deposit, the Kamukonko cobalt prospect and areas situated on the relatively under-explored southern edge of the Kolwezi Klippe, a prominent geological feature in the area. The total area included in the Mutoshi Project is 136.92 square kilometers.

In 2004, the company announced the joint venture agreement with Mining Company Katanga s.p.r.l. (MCK) to carry out feasibility study work on the Kinsevere-Nambulwa copper-cobalt deposits in Katanga Province of the Democratic Republic of Congo (DRC), owned by La Generale des Carrieres et des Mines (Gecamines), the DRC state-owned mining company.

The Kinsevere-Nambulwa properties lie approximately 50 kilometers north of the provincial capital of Lubumbashi and include two separate Exploitation Permits, Kinsevere and Nambulwa, totaling 19.5 square kilometers surrounded by a much larger area covered by Exploration Permits totaling 819 square kilometers. The two exploitation-permitted areas, approximately 25 kilometers apart, contain four distinct mineralized zones that outcrop at surface.

### Strategic Alliances

In July 2009, Anvil Mining Limited announced that it had completed an agreement with La Générale des Carrières et des Mines and the Government of the Democratic Republic of Congo ('DRC') on the terms of its Mutoshi Joint Venture ('JV') agreement.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
