Such information creates your awareness about principal trends of Aozora Bank, Ltd. business.

About Aozora Bank, Ltd.

Aozora Bank, Ltd. provides various financial products and services to corporate customers, financial institutions, public sector, and retail customers primarily in Japan. As of March 31, 2009, the bank had 20 domestic offices and 2 overseas representative offices.

Corporate Banking Group

The Corporate Banking Group provides domestic corporate clients, ranging from small to medium sized enterprises to large corporations, with loans, various types of finance, derivatives, and deposits. It offers syndicated loans, derivative products, securitization, private placement bonds, and trustee services. It also provides advisory services to serve needs for mergers and acquisitions in Japan.

Investment Banking Group

The Investment Banking Group includes real estate finance; special finance; leveraged finance; and asset finance. The bank makes investments in loans to ailing companies and to corporations facing the challenges of a changing operating environment, and provides recovery finance to companies under rehabilitation. AOZORA Loan Services

Co., Ltd., its loan servicer subsidiary targeted at corporate rehabilitation, provides support to financial institutions disposing of problem loans and also provides corporate advisory services, such as developing business recovery plan proposals.

The bank also provides finance for business revitalization, including domestic management buyouts (MBOs), and mergers and acquisitions (M&A). Also, the bank provides financing to medical institutions, nursing-care institutions, and hotels. In addition to financing the construction of new ocean-going ships, including cargo boats and tankers, the bank provides finance for the purchase of used ships and provides funds for refinancing. Its business promotion division includes international loans and investments, including structured credit investments, private equity investments, and fund investments.

Financial Institution Group

The Financial Institution Group provides a range of asset management products, including debentures and derivative products; loan-related products; securitized products; fund products, and financial instruments intermediary services. The bank provides time deposits and other shorter duration financial products. It also provides derivative-embedded products to its financial institution clients. The bank offers its financial institution clients participation in loan syndicates to grow and diversify their own loan portfolios. The bank is active in real estate investment trusts and structured transactions, as well as in the provision of traditional corporate loans to its financial institution clients. The bank also offers credit-linked loans and asset-backed loans.

The bank offers various fund products, focusing on private placement investment funds. Its product lineup consisting of Japanese equity funds (active, long-short and market neutral), and global bond funds allows its clients to obtain portfolio diversification. Through its securities subsidiary, Aozora Securities Co., Ltd., the bank offers its clients various Euro structured notes in response to their individual investment needs.

The bank provides various services targeted at business regeneration for financial institutions clients who need to deal with changes their management environment. The Bank's distressed loan servicing subsidiary, AOZORA Loan Services Co., Ltd., provides financing through its own recovery fund, and supports the establishment of regional revitalization funds, independent financial institution funds or funds participated in by Aozora, and revitalization funds for specific industries (hospitals and hotels). The bank also provides support to regional financial institutions in solving their loan issues through a range of advisory services, including the formulation of business recovery

plans and business strategies for clients. The bank provides advisory services on asset and liability management (ALM), financial activities, and market risk management.

Financial Markets Group

The Financial Markets Group handles the derivatives business, and the asset and liability management (ALM) business. The bank develops various deri

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
