## Abstracts

Apco Oil & Gas International Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Apco Oil & Gas International Inc. and its competitors. This provides our Clients with a clear understanding of Apco Oil & Gas International Inc. position in the [Energy](#) Industry.

The report contains detailed information about Apco Oil & Gas International Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Apco Oil & Gas International Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Apco Oil & Gas International Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Apco Oil & Gas International Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Apco Oil & Gas International Inc. business.

### **About Apco Oil & Gas International Inc.**

Apco Oil and Gas International Inc. operates as an international oil and gas exploration and production company with a focus on South America.

The company's primary properties in the Neuquen basin produce crude oil and associated natural gas. As of December 31, 2009, it had 4 gross development wells (0.9 net consolidated 1.2 net equity) in various stages of drilling or completion.

#### **NEUQUEN BASIN PROPERTIES**

**Entre Lomas Concession:** The Entre Lomas concession is located approximately 950 miles southwest of the city of Buenos Aires on the eastern slopes of the Andes Mountains. The concession covers a surface area of approximately 183,000 acres and produces oil and gas from 7 fields. These facilities include processing, treating, compression, injection, storage, power generation and an automatic custody transfer unit through which oil production is transported to market.

**Bajada del Palo Concession:** The Bajada del Palo concession has a total surface area of approximately 111,000 acres. It is located in the province of Neuquen immediately to the southwest of the Entre Lomas concession and to the northwest of the Agua Amarga

exploration area.

Agua Amarga and Charco del Palenque: The property has a total surface area of approximately 95,000 acres and is located immediately to the southeast of the Entre Lomas concession. In 2009, a portion of the Agua Amarga area covering approximately 18,000 acres was converted to a 25-year exploitation concession with a 5-year optional extension period. This new producing concession is called Charco del Palenque.

## NORTHWEST BASIN PROPERTIES

Acambuco Concession: The company holds a 1.5% participation interest in the Acambuco concession located in the province of Salta in northwest Argentina on the border with Bolivia. The concession covers an area of 294,000 acres. There are two producing fields in this concession, the San Pedrito and Macueta fields that produce primarily from the Huamampampa formation. The operator of the Acambuco joint venture is Pan American Energy Investments L.L.C. (PAE), an affiliate of British Petroleum PLC, which holds a 52 percent interest.

## AUSTRAL BASIN PROPERTIES

The company owns a 25.78% direct working interest in a joint venture engaged in exploration and production activities in three concessions located on the island of Tierra del Fuego. The operator of the concessions is ROCH S.A., a privately owned Argentine oil and gas company. The Austral basin extends both onshore and offshore from the provinces of Santa Cruz to Tierra del Fuego. The concessions cover a total surface area of approximately 467,000 gross acres, or 120,000 acres net to the company's interest.

## SAN JORGE BASIN PROPERTIES

In the San Jorge basin, the company's areas are prospective and exploratory in nature. In the province of Chubut, the company has a 41.73 percent working interest in the Cañadón Ramirez concession that is not producing. In the Sur Río Deseado Este concession in the province of Santa Cruz, the company has a 16.94 percent working interest in an exploitation area with limited oil production and an 88 percent working interest in an exploratory area in the northern sector of the concession.

Colombia

**Llanos Basin:** The company has entered into a farm-in agreement with TC Oil & Services, Ltd. to earn a 20 percent interest in the Llanos 32 Exploration and Production Contract (Llanos 32). The Llanos 32 block covers approximately 100,000 acres in the Llanos basin of western Colombia.

**Middle Magdalena Basin:** The company has entered into a farm in agreement with Petrolifera Petroleum (Colombia) Limited to earn a 50 percent working interest in the Turpial Exploration and Production Contract 'Turpial'. Petrolifera would be the operator. Turpial covers approximately 111,000 acres of underexplored area between the Velazquez and Cocorna oil fields in the Middle Magdalena basin.

### Customers

The company's major customers are Petrobras Energía S.A. and Esso Petrolera Argentina S.A.

### History

The company was founded in 1970. It was formerly known as Apco Argentina, Inc. and changed its name to Apco Oil and Gas International Inc. in 2009.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

### **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

### **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
