The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Aradyme Corp. business.

About Aradyme Corp.

Aradyme Corporation engages in the development and marketing of proprietary database management systems and related services. The company intends to commercialize its technology across multiple industries through strategic relationships with integrators for voter registration, data distribution-migration-repurposing, customer relationship management, and enterprise resource planning applications.

The company's products and services include data migration/conversion services, data extraction, transformation and loading (ETL) solutions, and custom application software development products, together with the training and support services required for the delivery of these products and services.

Products and Services

The company employs technology platform to deliver products and services in the following areas:

Data Migration/Conversion

Data migration represents moving or converting data elements from an existing

software application to a new software application. With data migration service model, the company allows its strategic allies to outsource the hassles data migration and conversion.

Data Integration

The company's data integration solution provides a framework for interfacing technologies that facilitates the ongoing collection, conversion, standardization, and delivery of data between multiple, disparate systems involved in an integration effort, regardless of the type of database, software, or hardware involved in the integration or the database's physical location. Through the use of this solution, customers are able to reduce the amount of work required to collect and move data from multiple systems during integration. Its solution also provides customers with an user interface to view data during the integration effort. The company's solution can also be continually modified to support changing business requirements. Its solution streamlines the data collection and reporting processes; enables systems to function together dynamically; and allows for the integration of multiple systems.

Application Development

The company's DBMS platform allows developers to revise, add to, or enhance an application at any time during the lifecycle of that application. Its DBMS can also be integrated with database solutions created by different development teams or offered by different companies. The company also developed and deployed a series of configurable off-the-shelf application solutions for the following vertical markets: financial/accounting, including accounts payable, accounts receivable, and general ledger plus complementary functions; point-of-sale, inventory and manufacturing control; customer relationship management (CRM) and sales tracking; and medical practice management, including patient management, scheduling, office management, insurance billing, and electronic medical records.

Product Delivery and Support

The company has established an on-site project operations center to help its allies integrate technologies into their data migration/conversion, data integration, or application development efforts.

Strategic Alliances

The company has established strategic alliances and/or contracts with a number of systems integrators and independent software vendors: Accenture LLP, the U.S.-based business of Accenture, a multinational management consulting, technology services and outsourcing company; Caselle, Inc., a privately held company that offers a variety of municipal government application software; IBM, is an information technology company; MAXIMUS, Inc., a governmental services company devoted to providing program management, consulting, and information technology services; PCC Technology Group, an information technology services company that provides software solutions to Global 2000 companies and local, state, and federal governments; REDCON, Inc., a private information services company providing engineering and computer technology services and products; Spillman Technologies, Inc., a private firm that is one of the providers of public safety software solutions, including records management, computer-aided dispatch, mobile communications, corrections management, fire/EMS management, and data sharing; and Unisys, a worldwide information technology services and solutions company.

The company also has a strategic alliance with Covansys, a consulting and technology services company, specializing in industry-specific solutions, strategic outsourcing, and integration services.

Competition

The company's competitors include Ascential, Informatica, Sunopsis, and Pervasive Software.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
