The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Arcadia Resources Inc. business.

About Arcadia Resources Inc.

Arcadia Resources, Inc. provides home care, medical staffing, home health products, and pharmacy services operating under the service mark Arcadia HealthCare. The company operates pharmacies in Indiana and Minnesota and has customer service centers in Michigan and Indiana.

Segments

The company operates in three reportable business segments: Home Care/Medical Staffing Services (Services), Pharmacy, and Catalog.

Services segment

The Services Segment provides home care and medical staffing services across the United States. Operated principally through the company's wholly-owned subsidiary, Arcadia Services, Inc. (ASI), this segment is a national provider of home care services, including skilled and personal care; and medical staffing services to various types of acute care and sub-acute care medical facilities. The Services segment provides nurses, home care aides, homemakers, and companions to home care clients. It provides nurses and various allied health professionals to medical facilities. The medical

staffing business provides per diem, local contract, and travel staffing services to its customers. The Services Segment operates through a network of both company-owned offices, as well as affiliate offices that are locally owned and operated under a contractual arrangement with the company.

Pharmacy Segment

The Pharmacy Segment offers its DailyMed medication management system. DailyMed transfers a patient's prescriptions, over-the-counter medications and vitamins and organizes them into pre-sorted 30-day supply packages marked with the date and time each dosage should be taken. The company is focused on marketing its DailyMed products and services to managed care providers and others responsible for managing the health care costs of the targeted population.

Catalog segment

The Catalog Segment includes a home-health oriented products catalog/on-line business to sell ambulatory and mobility products, respiratory products, daily living aids, bathroom safety products, and bathroom/home modification products. The company markets these products via direct mail and through its e-commerce Web site. The company and Sears, Roebuck and Co. executed a licensing agreement which allows it to sell similar merchandise for their www.sears.com and mail order catalog businesses.

Dispositions

In May and June 2009, the company disposed of its Home Health Equipment (HHE), retail pharmacy software, and industrial staffing businesses.

History

Arcadia Resources, Inc. was founded in 1994.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
