company's decision-making processes.

In the part that describes Arcadis NV competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Arcadis NV business.

About Arcadis NV

ARCADIS N.V., an international company, provides consultancy, planning, architectural design, engineering and management services for infrastructure, environment and buildings. It primarily has operation in the Netherlands, Europe, and the United States.

Business Lines

The company focuses its services on three main business lines: Infrastructure; Environment; and Buildings.

Infrastructure

The company's infrastructure services create the conditions for transportation and for healthy places to live and work. This business line includes services for transportation (traffic management, highways, railroads, waterways, bridges, tunnels); water (water management, water quality, hydraulic engineering); land development (residential, industrial, recreational, mixed-use, urban and rural planning); and energy (hydropower plants, biogas installations, windmill farms).

Environment

The company provides various environmental services by delivering projects that protect the earth's resources while meeting its client's economic objectives. Ranging from soil and groundwater remediation and environmental impact assessments to consultancy on corporate energy, product stewardship, health and safety and waste management issues, its services support environmental policies for companies and governments.

The company also assists clients with environmental assessments, site closures and reuse, product stewardship issues, climate change mitigation – including carbon footprint minimization and renewable energy – health & safety issues and services for noise abatement, solid waste disposal and the preservation of nature and the natural landscape.

Buildings

The company's services include architectural design and master planning, management services, consultancy and specialized engineering. Projects it works on are inner city (re)developments, office buildings, industrial sites, data centers, hotels, resorts and other leisure facilities, shopping centers, hospitals, schools, museums, public buildings or a mixed use of these functions.

Clients

The company works for a range of clients in the public and private sector.

In Infrastructure, the company performs its work for governments: municipalities, cities, provinces, states, water boards, and ministries. It also works for utilities, project developers, contractors and other private sector firms.

In Environment, the company works for the private sector, including the oil and gas industry, chemical industry, and transportation. It also works for governments, from federal clients (such as the U.S. Department of Defense) to municipal customers.

In Buildings, the company mainly works for owners, managers, operators or developers of real estate, both from the public and private sector.

Acquisitions

In January 2008, the company acquired 100% of the shares of LFR Inc., a U.S.-based

environmental services company.

In April 2008, the company acquired 100% of the shares of the Dutch company Meander Advies en Onderzoek BV, active in water-management, with a strong focus on river projects.

In April 2008, the company acquired 100% of the shares of Elekol, a Polish company active in railway infrastructure and transportation.

In May 2008, the company acquired 100% of the shares of the Belgian engineering firm Luc Van de Sype bvba (VDS), specialized in infrastructure projects.

In June 2008, the company acquired 50% of the shares of the Romanian company TGH S.r.l., while the remaining 50% of the shares were acquired in October 2008.

In July 2008, the company acquired 100% of the shares of SET S.r.l., an Italian company specialized in environmental consulting services.

Dispositions

In August 2008, the company divested Copijn Utrecht Holding BV, the design and contracting firm specialized in green amenities projects.

Competition

The company identifies competition from AECOM; URS; Altran Technologies; Atkins; CH2M HILL; SNC-Lavalin Group; Parsons Corporation; Mott MacDonald Group; and Fugro.

History

ARCADIS N.V. was founded in 1888.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
