Abstracts

Arch Coal Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Arch Coal Inc. and its competitors. This provides our Clients with a clear understanding of Arch Coal Inc. position in the [Energy](#) Industry.

The report contains detailed information about Arch Coal Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Arch Coal Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Arch Coal Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Arch Coal Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Arch Coal Inc. business.

About Arch Coal Inc.

Arch Coal, Inc. engages in the production of coal in the United States. As of December 31, 2009, the company operated 19 active mines located in each of the low-sulfur coal-producing regions of the United States. The company sells its coal to coal-fueled power plants, steel mills, and export facilities

Mining Operations

At December 31, 2009, the company operated 19 active mines at 11 mining complexes located in the United States. The company has three reportable business segments, which are based on the low-sulfur coal producing regions in the United States in which the company operates — the Powder River Basin, the western Bituminous region, and the Central Appalachia region.

The company's operations in the Powder River Basin are located in Wyoming and include two surface mining complexes (Black Thunder and Coal Creek). The company's operations in the western Bituminous region are located in southern Wyoming, Colorado, and Utah and include four underground mining complexes (Dugout Canyon, Skyline, Sufco, and West Elk) and one surface mining complex (Arch of Wyoming). The company's operations in the Central Appalachia region are located in southern West

Virginia, eastern Kentucky, and southwestern Virginia and include four mining complexes (Coal-Mac, Cumberland River, Lone Mountain, and Mountain Laurel) consisted of nine underground mines and four surface mines.

Powder River Basin

Black Thunder: Black Thunder is a surface mining complex located on approximately 33,800 acres in Campbell County, Wyoming. The Black Thunder mining complex extracts steam coal from the Upper Wyodak and Main Wyodak seams. The Black Thunder mining complex had approximately 1.5 billion tons of proven and probable reserves as of December 31, 2009. The Black Thunder mining complex consists of seven active pit areas and three owned loadout facilities.

Coal Creek: Coal Creek is a surface mining complex located on approximately 7,400 acres in Campbell County, Wyoming. The Coal Creek mining complex extracts steam coal from the Wyodak-R1 and Wyodak-R3 seams. The Coal Creek mining complex had approximately 197 million tons of proven and probable reserves as of December 31, 2009. The Coal Creek complex consists of two active pit areas and a loadout facility.

Western Bituminous

Arch of Wyoming: Arch of Wyoming is a surface mining complex located in Carbon County, Wyoming. The Arch of Wyoming complex consists of one active surface mine and four inactive mines located on approximately 58,000 acres that are in the final process of reclamation and bond release. The Arch of Wyoming mining complex extracts coal from the Johnson seam. The active Arch of Wyoming mining operations had approximately 14.8 million tons of proven and probable reserves as of December 31, 2009. The active Arch of Wyoming mining operations consist of one active pit area.

Dugout Canyon: Dugout Canyon mine is an underground mining complex located on approximately 18,200 acres in Carbon County, Utah. The Dugout Canyon mining complex has extracted steam coal from the Rock Canyon and Gilson seams. The Dugout Canyon mining complex had approximately 19.8 million tons of proven and probable reserves as of December 31, 2009. The complex consists of a longwall, three continuous miner sections, and a truck loadout facility. The company washes a portion of the coal the company produces at a 400-ton-per-hour preparation plant.

Skyline: Skyline is an underground mining complex located on approximately 12,400 acres in Carbon and Emery Counties, Utah. The Skyline mining complex extracts steam

coal from the Lower O'Conner A seam. The Skyline mining complex had approximately 19.2 million tons of proven and probable reserves as of December 31, 2009. The Skyline complex consists of a longwall, a continuous miner section, and a loadout facility.

Sufco: Sufco is an underground mining complex located on approximately 27,550 acres in Sevier County, Utah. The Sufco mining complex extracts steam coal from the Upper Hiawatha seam. The Sufco mining complex had approximately 66.2 million tons of proven and probable reserves as of December 31, 2009. The Sufco complex consists of a longw

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
