The Archer Daniels Midland Company financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Archer Daniels Midland Company competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Archer Daniels Midland Company business.

About Archer Daniels Midland Company

Archer Daniels Midland Company engages in procuring, transporting, storing, processing, and merchandising agricultural commodities and products.

The company is a processor of oilseeds, corn, wheat, cocoa, and other feedstuffs. It is a manufacturer of vegetable oil and protein meal, corn sweeteners, flour, biodiesel, ethanol, and other value-added food and feed ingredients. It also has a grain elevator and transportation network to procure, store, clean, and transport agricultural commodities, such as oilseeds, corn, wheat, milo, oats, and barley, as well as processed agricultural commodities.

Segments

The company's operations are classified into three segments, including Oilseeds Processing, Corn Processing, and Agricultural Services.

Oilseeds Processing

The Oilseeds Processing segment includes activities related to the origination,

merchandising, crushing, and further processing of oilseeds, such as soybeans, cottonseed, sunflower seeds, canola, rapeseed, peanuts, flaxseed, and palm into vegetable oils and protein meals. The Oilseeds Processing segment principally produces and markets processed oilseed products as ingredients for the food, feed, energy, and other industrial products industries. Crude vegetable oil is sold 'as is' or is further processed by refining, blending, bleaching, and deodorizing into salad oils. Salad oils are sold 'as is' or are further processed by hydrogenating and/or interesterifying into margarine, shortening, and other food products. Partially refined oil is used to produce biodiesel or is sold to other manufacturers for use in chemicals, paints, and other industrial products. Oilseed protein meals are principally sold to third parties to be used as ingredients in commercial livestock and poultry feeds. The Oilseeds Processing segment also produces natural health and nutrition products and other specialty food and feed ingredients. In North America, cottonseed flour is produced and sold primarily to the pharmaceutical industry and cotton cellulose pulp is manufactured and sold to the chemical, paper, and filter markets. In South America, the Oilseeds Processing segment utilizes a network of grain elevators, port facilities and transportation assets to buy, store, clean, and transport agricultural commodities and operates fertilizer blending facilities.

The company produces a range of edible soy protein products, including soy flour, soy grits, soy protein concentrates and soy isolates that are used in processed meats, baked foods, nutritional products, snacks, and dairy and meat analogs.

From co-products of oilseeds, the company produces natural source vitamin E, tocopherol antioxidants and phytosterols, which are marketed to the dietary supplement and food industry. The company produces soy isoflavones, a dietary supplement, from a co-product of edible soy processing.

Golden Peanut Company LLC, a joint venture between the company and Alimenta (U.S.A.), Inc., is a major supplier of peanuts and peanut derived ingredients to both the domestic and export markets. The company has a 50% ownership interest in this joint venture.

The company has a 50% interest in Edible Oils Limited, a joint venture between it and Princes Foods to procure, package, and sell edible oils in the United Kingdom. It announced the formation of a new edible oils joint venture with Princes Foods in Poland.

Stratas Foods LLC, a joint venture between the company and ACH Jupiter, LLC, a

subsidiary of Associated British Foods, procures, packages, and sells edible oils in North America. The company has a 50% ownership interest in this joint venture.

The company has a 16.4% ownership interest in Wilmar International Limited (Wilmar), an agribusiness group in Asia. Wilmar operates as a processor and merchandiser of palm and lauric oils, and a major oil palm plantation owner. In China, Wilmar is a consumer edible oils producer, oilseeds crusher, edible oils refiner, and specialty fats and oleochemicals manufacturer.

The company is a major supplier of agricultural commodity raw materials to Edible Oils Limited, Stratas Foods LLC, and Wilmar.

Corn Processing

Corn Processing segment engages i

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
