Abstracts

Argyle Security, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Argyle Security, Inc. and its competitors. This provides our Clients with a clear understanding of Argyle Security, Inc. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Argyle Security, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Argyle Security, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Argyle Security, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Argyle Security, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Argyle Security, Inc. business.

About Argyle Security, Inc.

Argyle Security, Inc., through its subsidiary, ISI Security Group, Inc., designs, engineers, supplies, installs, and maintains a range of physical electronic security solutions to commercial, governmental, and correctional customers in the United States.

Segments

The company conducts its operations through two segments, including Argyle Corrections and Argyle Commercial Security.

Argyle Corrections

Argyle Corrections engages in the design and installation of security solutions for public and privately-owned/operated detention facilities. Argyle Corrections designs, assembles, supplies, installs, and maintains access control, video and integrated electronic control systems for correctional and government facilities throughout the United States. Argyle Corrections offers electronic security system solutions revolving around access control, including: electronic locking systems and hardware and security doors and frames. Argyle Corrections also includes the sale and design of jail furniture, security glazing and other security-based systems. It provides the goods and services to

detention market integrators, electrical contractors and competitors of Argyle that lack their own in-house electronic solutions. Argyle Corrections' product offerings include security locking systems, security hollow metal doors and wall panels, security windows, security glass and glazing, security furnishings and accessories, design support and full installation capabilities. Argyle Corrections consists of all of the company's businesses in the corrections sector, including Metroplex Control Systems, Inc. (MCS), ISI-Detention, as well as Com-Tec and PDI.

Argyle Corrections includes: MCS (MCS-Detention), which designs, engineers, supplies, installs and maintains complex, customized physical and software security solutions, access control, video and electronic security control system solutions at correctional and government facilities; ISI-Detention, which designs, engineers, supplies, installs and maintains detention systems and equipment, targeting correctional facilities throughout the United States; PDI, which is a full-service, turnkey solutions provider that manufactures high-security metal barriers, high-security observation window systems, detention furniture and accessories; and Com-Tec, which engages in the custom design and manufacture of electronic security and communications systems.

Argyle Commercial Security

Argyle Commercial Security focuses on the commercial security sector and provides turnkey, electronic security systems to the commercial market. MCS Commercial Fire & Security, referred to as MCS-Commercial, operates out of its own San Antonio headquarters and five regional offices in Texas and Colorado. Its security systems cover access control, video systems, intrusion detection systems, proximity and smart cards, biometric technology, photo identification (ID) printers and supplies among others. It also secures the community by leveraging technology through installation of intelligent perimeter security, wireless video, IP video and intelligent video surveillance. Its fire detection systems include QuickStart, EST2 & EST3, integrated life support systems, control panels, detectors, and audible and visible signals. Argyle Federal Systems is a newly operational business unit, which focuses on providing security solutions and services targeted at the federal government. In November 2008, Argyle Commercial Security secured a supply contract through the U.S. General Services Administration (GSA) to provide integrated security solutions and products to the various departments in the United States federal government and any other entity that purchases off the GSA contract. These solutions and products consist of Access Control, Video, Perimeter Security and ID Credentials.

In January 2008, MCFSA, Ltd. and all of the partnership interests of which are directly

or indirectly wholly owned by ISI, acquired substantially all of the business assets and liabilities of Fire Quest Inc. (Fire Quest). Fire Quest is engaged in the business of alarm system sales and service.

In January 2008, ISI acquired substantially all

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
