Abstracts

Armor Electric, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Armor Electric, Inc. and its competitors. This provides our Clients with a clear understanding of Armor Electric, Inc. position in the Industry.

The report contains detailed information about Armor Electric, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Armor Electric, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Armor Electric, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Armor Electric, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Armor Electric, Inc. business.

About Armor Electric, Inc.

Armor Electric, Inc., a development stage company, through its subsidiary Nova Electric Systems, Inc., engages in the development and marketing of electronic propulsion and battery power systems for electric powered vehicles.

Nova Electric Systems, through an agreement with Nu Age Electric, Inc. (Nu Age), has rights relating to the manufacture and sale of electrically powered vehicles pursuant to agreements between Nu Age and Hero/Majestic Auto Limited (Hero).

Nova, through agreement with NuAge, holds the rights for the use of certain proprietary technology to install electric propulsion systems on various electric powered vehicles to include mountain bikes, regular cycles, children's cycle toys and riding vehicles, recreation ATV units, scooters, motorcycles, go-karts, NEV (Neighborhood Electric Vehicle) cars, race cars, regular passenger cars, buses and all other types of two and three wheeled vehicles, water craft and in addition various other vehicles and products

Nova has also acquired the rights from NuAge, to certain agreements between NuAge and the bicycle manufacturer Hero Cycles in India, for the joint venture to manufacture and distribute various electric powered two and three wheel vehicles in India and for distribution from the Hero manufacturing facilities worldwide. In January, 2006, the

company entered into a Joint Venture Agreement with Nu Pow'r, LLC to make and distribute electric propulsion systems.

Target Markets

The company intends to focus on four specific market segments: Transportation; Recreation, Leisure and Riding Toys; Defense; and Industrial/Utility.

Transportation Segment: The company primarily focuses on this market. It intends to enter this market from two directions: through joint ventures with manufacturers of two and three wheeled vehicles such as electric scooters and cycles; and through the parts market, by developing electrical components and battery systems.

Recreation, Leisure and Riding Toys Segment: The company has entered into negotiations with representatives from major manufacturers of these products in Asia and Europe to develop products designed to fill the market for riding toys in the 7-14 year age bracket. They include a series of small electric powered motorcycles with full suspension, cushioned seats, and pneumatic tires.

Defense Segment: The defense industry offers opportunities in various areas, including funding for research and development. The defense industry is actively seeking the type of technology that Nova has developed.

Industrial/Utility Segment: The company intends to introduce various product lines of Hybrid Utility Vehicles. These vehicles would include small ATV Quad type units, industrial lift platforms, and small two passenger light cargo trucks.

History

Armor Electric, Inc. was founded in 2003.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
