term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes AstraZeneca PLC competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of AstraZeneca PLC business.

About AstraZeneca PLC

AstraZeneca PLC engages in the discovery, development, and commercialization of prescription medicines for various areas of healthcare. The company's international sales and marketing organization is active in approximately 100 countries.

Products

The company focuses on six therapy areas: Cardiovascular, Gastrointestinal, Infection, Neuroscience, Oncology, and Respiratory & Inflammation.

Cardiovascular Product Area

Crestor (rosuvastatin calcium) is a statin for the treatment of dyslipidaemia and hypercholesterolemia, and to slow the progression of atherosclerosis.

Atacand (candesartan cilexetil) is an angiotensin II antagonist for the 1st line treatment of hypertension and symptomatic heart failure.

Seloken/Toprol-XL (metoprolol succinate) is a beta-blocker once-daily tablet for 24-hour control of hypertension and for use in heart failure and angina.

Tenormin (atenolol) is a cardioselective beta-blocker for hypertension, angina pectoris and other CV disorders.

Zestril (lisinopril dihydrate) is an ACE inhibitor used for the treatment of a range of CV diseases, including hypertension.

Plendil (felodipine) is a calcium antagonist for the treatment of hypertension and angina.

Onglyza (saxagliptin) is a dipeptidyl peptidase IV inhibitor for the treatment of Type 2 diabetes.

During 2009, Onglyza was launched in the U.S., Canada, Mexico, Germany, the U.K. and Denmark and was approved in Argentina, Brazil, India and the EU. The company has collaboration on a worldwide basis with Bristol-Myers Squibb Company (BMS) to develop and commercialise two compounds discovered by BMS (Onglyza (saxagliptin) and dapagliflozin) for the treatment of Type 2 diabetes. In December 2009, AstraZeneca and BMS submitted an NDA for the once-daily fixed-dose combination of Onglyza (saxagliptin) and metformin.

Gastrointestinal Product Area

Nexium (esomeprazole) is the proton pump inhibitor (PPI) for the treatment of acid-related diseases to offer clinical improvements over other PPIs and other treatments. Nexium oral and intravenous was approved in the EU and other markets for the short-term maintenance of haemostasis and prevention of re-bleeding in patients following therapeutic endoscopy for acute bleeding gastric or duodenal ulcers. Nexium i.v., which is used when oral administration is not suitable for the treatment of GERD and upper GI side effects induced by NSAIDs, is approved in 86 countries, including the U.S and all EU countries.

Losec/Prilosec (omeprazole) is used for the short-term and long-term treatment of acid-related diseases. Losec/Prilosec is available both as a prescription-only medication and, in some countries, as an OTC medication where it offers consumers a self-medication option for the treatment of heartburn compared to antacids and H2 receptor antagonists. In 2009, an agreement to license rights for Losec for OTC use to Bayer Consumer Care AG was announced.

Entocort (budesonide) is a locally acting corticosteroid for the treatment of inflammatory

bowel disease. Entocort is approved for the treatment of two types of inflammatory bowel disease. Entocort capsules are approved for use both as an acute treatment of and for maintenance of remission for mild to moderate Crohn's disease. Entocort enema is approved in some markets for the treatment of ulcerative colitis.

Infection Product Area

Synagis (palivizumab) is a humanised MAb used for the prevention of serious lower respiratory tract disease caused by respiratory syncytial virus (RSV) in paediatric patients at high risk of acquiring RSV disease.

Merrem/Meronem1 (meropenem) is a carbapenem anti-bacterial used for the treatment of serious infections in hospitalised patients.

FluMist (influenza virus vaccine live, intranasal) is a live, attenuated, trivalent influenza virus vaccine approved for active immunization of people two to 49 years of age against influenza disease caused by influenza virus subtypes A and B contained in the vaccine.

H1N1 influenza (swine flu) vaccine was developed and delivered to the HHS and is indicated for the active immunization of individuals two to 49 years of age against influenza caused by pa

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
