The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of athenahealth, Inc. business.

About athenahealth, Inc.

athenahealth, Inc. provides Internet-based business services for physician practices. The company's service offerings are based on four integrated components: its proprietary Internet-based software; its database of payer reimbursement process rules; its back-office service operations that perform administrative aspects of billing and clinical data management for physician practices; and its automated and live patient communication services.

Services

athenaCollector

The company's principal offering, athenaCollector, is its revenue cycle management service that automates and manages billing-related functions for physician practices and includes a practice management platform. athenaCollector assists its physician clients with the handling of claims and billing processes to help manage reimbursement.

Software (athenaNet): Through athenaNet, athenaCollector utilizes the Internet to connect physician practices to its rules engine and service operations team. athenaNet includes a workflow dashboard used by its clients and its services team to track claims

requiring edits in real-time before they are sent to the payer, claims requiring work that have come back from the payer unpaid, and claims that are being held up due to administrative steps required by the individual client. This Internet-native functionality provides its clients with the benefits of its database of payer rules as it is updated and enables them to interact with its services team to monitor workflows.

Knowledge (athenaRules): Physician practices route their day-to-day electronic and paper-based payer communications to the company, which it then processes using athenaRules and its service operations to avoid reimbursement delays and improve practice performance.

Work (athenahealth Service Operations): athenahealth Service Operations enables the service teams that collaborate with client staff to achieve successful transactions. The company's Service Operations consists of both knowledgeable staff and technological infrastructure used to execute the key steps associated with handling of physician claims and clinical data management. The service team interacts with physicians, providers, and clinicians at various key steps in the revenue cycle, including coordinating with payers to ensure that client providers are set up for billing; checking the eligibility of scheduled patients electronically; submitting claims to payers directly or through intermediaries, whether electronically or via printed claim forms; obtaining confirmation of claim receipt from payers, either electronically or through phone calls; receiving and processing checks and remittance information from payers and documenting the result of payers' responses; evaluating denied claims and determining the best approach to appealing and/or resubmitting claims to obtain payment; billing patients for balances that are due; compiling and delivering management reporting about the performance of clients at both the account level and the provider level; transmitting key clinical data to the revenue cycle workflow to eliminate the need for code re-entry and to permit assembling all key data elements required to achieve maximum appropriate reimbursement; and providing proactive and responsive client support to manage issues, address questions, identify training needs, and communicate trends.

athenaClinicals

athenaClinicals is its clinical cycle management service that automates and manages medical-record-management-related functions for physician practices and includes an electronic health record (EHR) platform. It assists medical groups with the handling of physician orders and related inbound and outbound communications.

Software (athenaNet): Through athenaNet, athenaClinicals displays key clinical measures by office location related to the drivers of quality care delivery on a workflow dashboard, including lab results requiring review, patient referral requests, prescription requests, and family history of previous exams. athenaNet provides reporting on a range of clinical results, including distribution of different procedure codes (leveling), incidence of different diagnoses, t

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
