The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Atlantia SpA business.

About Atlantia SpA

Atlantia SpA engages in the operation of motorways under concessions granted by the relevant authorities. Under the related concession arrangements, the company's concessionaires are responsible for the construction, management, improvement, and upkeep of sections of motorway in Italy and worldwide.

The company also has overseas operations. It is in the process of acquiring investments in five concessionaires that operate a total of 702 km of toll motorway in Brazil and Chile. There are 255 service areas along the motorway network operated by the company and its motorway subsidiaries.

Traffic

The total number of kilometres travelled on the networks managed by the company during 2008 amounted to 55,078 million: 42,619 million by light vehicles and 12,459 million by heavy vehicles.

Motorway Subsidiaries

In addition to Autostrade per l'Italia's investments in major works, Autostrade Meridionali, Raccordo Autostradale Valle d'Aosta and Strada dei Parchi are engaged in

works on 52 km of motorways.

International activities

Stalexport Autostrady: Stalexport Autostrady, a Polish-registered company, holds the motorway concession for the 61 km long A4 Krakow-Katowice motorway via its wholly owned subsidiary, Stalexport Autostrada Malopolska. During 2008, the section of motorway managed by the concessionaire, Stalexport Autostrada Malopolska, registered an average daily traffic volume of 28,670 vehicles (including both light and heavy components), representing a total of approximately 640 million km travelled.

Electronic Transaction Consultants (ETC): ETC is a U.S. provider of systems integration, hardware and software maintenance, customer services and consultancy in the field of free flow electronic toll collection systems.

Pune-Solapur concession in India: In February 2009, Atlantia, in consortium (50-50) with Navinya Buildcon Private Limited (NBPL), a wholly owned subsidiary of the Tata Group, was awarded the concession for the 110-km Pune-Solapur section of motorway in the Indian state of Maharashtra.

History

Atlantia SpA was founded in 2003.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
