The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Atlantic Coast Federal Corporation business.

About Atlantic Coast Federal Corporation

Atlantic Coast Federal Corporation operates as the holding company for Atlantic Coast Bank that provides various banking services to individual and business customers primarily in southern coastal Georgia and northern coastal Florida.

The company's principal business consists of attracting retail deposits from the general public and investing those funds in permanent loans secured by first mortgages on owner-occupied, one- to four-family residences, home equity loans, commercial real estate loans and, automobile, and other consumer loans. It also originates multi-family residential loans, commercial business loans, and commercial construction and residential construction loans.

Market Area

The company is headquartered in Waycross, Georgia, with branches located in Waycross, Douglas and Garden City, Georgia, as well as the Jacksonville metropolitan area, including Jacksonville Beach, Orange Park, Neptune Beach, Westside, Southside, and Julington Creek.

Lending Activities

One- to Four-Family Real Estate Lending: The company originates one- to four-family mortgage loans on a fixed-rate and adjustable-rate basis and is secured by properties located in southeastern Georgia and the metropolitan Jacksonville area. It sells loans to investors in the secondary market.

Commercial Real Estate Lending: The company offers commercial real estate loans for permanent financing and construction, which are secured by small retail establishments, rental properties, storage facilities, and office buildings located in its primary market area. It originates fixed-rate and adjustable-rate commercial real estate loans.

Other Real Estate Loans: The company offers loans secured by multi-family residential real estate which are secured by real estate located in its primary market area. Multi-family residential loans are originated with adjustable interest rates based on the prime rate or U.S. Treasury securities.

Real Estate Construction Lending: The real estate construction portfolio consists of residential and commercial construction loans. Residential construction loans, including those purchased from brokers, are made for the construction of pre-sold builder homes to individual borrowers. It also offers construction-to-permanent loans.

Home-Equity Lending: The company originates fixed-term amortizing home equity loans.

Consumer Loans: The company offers various consumer loans, including fixed rate, having shorter terms to maturity, thereby reducing exposure to changes in interest rates, and carrying higher rates of interest. The consumer loan portfolio includes manufactured home loans.

Commercial Business Lending: The company offers commercial business loans, which are secured by assets other than real estate there by providing working capital, inventory financing, and equipment financing.

Investment Activities

The company invests in various types of liquid assets, including the U.S. treasury obligations, securities of various federal agencies and government sponsored enterprises, certificates of deposit of insured banks and savings institutions, bankers'

acceptances, repurchase agreements, and federal funds.

Deposits

The company offers various deposit products, including savings accounts, money market accounts, demand deposit accounts, and time deposit accounts.

History

Atlantic Coast Federal Corporation was founded in 1939.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
