company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Atlas Pipeline Partners LP competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Atlas Pipeline Partners LP business.

About Atlas Pipeline Partners LP

Atlas Pipeline Partners, L.P. engages in the transmission, gathering and processing of natural gas. The company provides natural gas gathering services in the Anadarko, Arkoma and Permian Basins in the southwestern and mid-continent United States and the Appalachian Basin in the eastern the United States. In addition, the company provides natural gas processing services in Oklahoma and Texas.

The company's general partner, Atlas Pipeline Partners GP, LLC (Atlas Pipeline GP or the General Partner), manages its operations and activities through its ownership of its 2% general partner interest. Atlas Pipeline GP is a wholly owned subsidiary of Atlas Pipeline Holdings, L.P. (AHD), a publicly traded Delaware limited partnership.

Segments

The company conducts its business through two segments: Mid-Continent operations and Appalachian operations.

Mid-Continent Operations

The company owns and operates approximately 9,100 miles of intrastate natural gas

gathering systems located in Oklahoma, Kansas, and Texas. It also own and operate eight processing plants and one treating facility located in Oklahoma and Texas.

The company's gathering, processing, and treating assets service long-lived natural gas regions, including the Permian and Anadarko Basins. Its systems gather natural gas from oil and natural gas wells and process the raw natural gas into merchantable, or residue, gas by extracting NGLs and removing impurities. In the aggregate, its Mid-Continent systems have approximately 7,900 receipt points, consisting primarily of individual well connections and, secondarily, central delivery points which are linked to multiple wells. The company's gathering systems interconnect with interstate and intrastate pipelines operated by ANR Pipeline Company, CenterPoint Energy, Inc., El Paso Natural Gas Company, Enogex LLC, Kinder Morgan Texas Pipeline, Natural Gas Pipeline Company of America, Northern Natural Gas Company, ONEOK Gas Transportation, LLC, Panhandle Eastern Pipe Line Company, LP and Southern Star Central Gas Pipeline, Inc. The company's processing facilities are connected to NGL pipelines operated by ONEOK Hydrocarbon, L.P.

Mid-Continent

The primary producing areas in the region include the Anadarko Basin and the Permian Basin.

Mid-Continent Gathering Systems

Chaney Dell: The Chaney Dell gathering system is located in north central Oklahoma and southern Kansas' Anadarko Basin. As of December 31, 2009, the gathering systems had approximately 4,100 miles of active natural gas gathering pipelines with approximately 3,700 receipt points.

Elk City/Sweetwater: The Elk City and Sweetwater gathering system includes approximately 800 miles of active natural gas pipelines located in the Anadarko Basin in western Oklahoma and the Texas panhandle, which encompasses the Atoka Wash and Granite Wash formations. The Elk City and Sweetwater gathering system connects to approximately 700 receipt points, with a majority of the system's western end located in areas of active drilling.

Midkiff/Benedum: The Midkiff/Benedum gathering system, which the company operates and in which it has an approximate 72.8% ownership as of December 31, 2009, consists of approximately 3,000 miles of active natural gas gathering pipelines and

approximately 2,800 receipt points located across four counties with in the Permian Basin in West Texas.

Velma: The Velma gathering system is located in the Golden Trend and near the Woodford Shale areas of southern Oklahoma. As of December 31, 2009, the gathering system had approximately 1,200 miles of active pipelines with approximately 700 receipt points consisting primarily of individual well connections and, secondarily, central delivery points which are linked to multiple wells.

Mid-Continent Processing and Treating Plants

Chaney Dell: The Chaney Dell system processes natural gas through the Waynoka and Chester plants, which are active cryogenic natural gas processing facilities. The Chaney Dell system's processing operations have total capacity of approximately 228 MMCFD. The Waynoka processing plant, located in Woods County, Oklahoma. The company transport and sell natural gas

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
