Abstracts

ATNA Resources Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between ATNA Resources Ltd. and its competitors. This provides our Clients with a clear understanding of ATNA Resources Ltd. position in the [Metals and Mining](#) Industry.

The report contains detailed information about ATNA Resources Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for ATNA Resources Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The ATNA Resources Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes ATNA Resources Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ATNA Resources Ltd. business.

About ATNA Resources Ltd.

Atna Resources Ltd., a mineral resource company, engages in the exploration, acquisition, development, and mining of precious metals(gold and silver), uranium and other mineral properties in the western United States, Canada, and Chile.

Production Property

The Briggs Mine is located on the west side of the Panamint Range near Death Valley, California. It has mineral rights over approximately 4,800 acres in the area of the mine. It owns or controls 264 unpatented claims, including 18 mill site claims, on U.S. Bureau of Land Management (BLM) administered land and through leasehold interests, 100% of the Briggs Mine. In addition to the Briggs Mine, it owns four satellite properties located approximately four miles north of Briggs: the Cecil R, Jackson, Mineral Hill and Suitcase properties. It holds or leases a total of 22 unpatented claims and 3 patented claims associated with these properties. The Briggs Mine has open pit proven and probable reserves containing 267,000 ounces of gold.

Development Properties

Pinson Mine Property: The company has entered into an exploration agreement with

Pinson Mining Company (PMC), a subsidiary of Barrick Gold. It owns a 70% interest in the Pinson Mine Property. The Pinson Mine property is located in Humboldt County, Nevada, approximately 30 miles east of Winnemucca. The property includes 3,800 acres of patented fee lands wholly-owned by PMC, 360 acres of leased patented fee lands, 8,496 acres of federal unpatented lode mining claims wholly-owned by PMC, 1,362 acres of leased federal unpatented lode claims. A total of 553 unpatented federal lode mining claims (both owned and leased by PMC) are included in the property position.

Reward Project: The company controls approximately 1,600 acres in southwestern Nye County approximately 5.5 miles south-southeast of Beatty, NV where it holds 18 unpatented lode claims under three mining leases. It owns or leases 116 unpatented lode mining claims, 6 unpatented placer claims, 3 millsite claims and 6 patented placer claims.

Columbia Property: The Columbia property is located seven miles east of Lincoln and 45 miles northwest of Helena, in Lewis and Clark County, Montana. The property consists of approximately 24 patented and 68 unpatented mining claims containing approximately 1,800 acres.

Exploration Properties

The company has obtained an option to acquire a 100% interest in 22 claims on the Clover property. Yamana Gold Inc. has the right to acquire a 51% interest in the property. The Clover property is situated 68 kilometers northeast of Winnemucca in Elko County, north-central Nevada, and consists of 110 unpatented lode claims covering approximately 2,000 acres. The Clover prospect is a low sulfidation epithermal, vein-hosted gold prospect.

Tuscarora and Adelaide Properties: The company has entered into an option agreement with Golden Predator where Golden Predator would assume the obligation of Canyon regarding the option with Newmont on the Adelaide and Tuscarora gold exploration properties.

Sand Creek and Converse Uranium Joint Ventures, Wyoming: The Sand Creek uranium joint venture area of interest is located to the south and east of Douglas, Wyoming. The Sand Creek Joint Venture (Sand Creek JV) is owned 70% by the Converse Uranium Joint Venture and 30% by Uranium One Exploration USA Inc. The purpose of these joint ventures is to combine property positions over a portion of the Sand Creek JV

area. The area of interest for the Sand Creek JV covers an area of approximately 92,000 acres, located east and south of Douglas, Wyoming.

Montana Mineral Rights: Canyon Resources Corporation (Canyon) owns approximately 900,000 acres of mineral rights and fee lands in western Montana. The company is marketing approximately 860,000 acres of its total mineral rights package, which includes its barite properties.

Mt. Edna Prospect: The company staked 36 lode mining claims over part of a possible porphyry related grass-roots gold-copper prospect in southeastern Humboldt County, Nevada approximately 10 miles southeast of the town of Golconda.

Tram Prospect: The Tram prospect is located at the very western end of Yucca Mountain about 15 miles north of Canyon's Reward Project and 6 miles east of the town of Beatty in southern Nye County, Nevada. The company staked 22 lode claims to cover an area of intense advanced argillic alteration, silicification and disseminated limonite after pyrite hosted in andesitic to dacitic volcanic rocks of Miocene Age.

Triple Junction/Dixie Fork: The company owns a 100% interest in the property. The Triple Junction/Dixie Fork property is located at the south end of the Carlin Trend 20 miles South West of Elko in north central Nevada, USA and consists of 31 lode claims for approximately 620 acres. The Triple Junction property is located approximately 3 miles south east of Dixie Fork and is comprised of 36 lode claims for approximately 640 acres.

Dixie Fork: The Dixie Fork property is located in the Pinon Range, 12 miles SSW of Newmont's Rain/Tess/Saddle Mine complex, in Elko County, Nevada.

Triple Junction: The Triple Junction property is located in the Pinon Range, 14 miles SSW of the Newmonts Rain/Tess/Saddle Mine complex, in Elko County, Nevada.

Atlanta: The Atlanta gold project is located in Lincoln County, Nevada. The company has 267 unpatented federal lode claims covering possible strike and dip extensions of gold-silver mineralization centered at the Atlanta Mine.

Canadian Properties: The company holds mineral rights, and in one case patented mineral and surface rights, in six properties located in the Yukon and British Columbia.

Dispositions

In September 2008, the company sold a portfolio of royalty interests. The royalty package comprised four royalty interests; a sliding scale precious metal NSR royalty on the Wolverine Project located in the Yukon Territory, a 3 percent NSR royalty on portions of the McDonald gold property in Montana, and royalty interests on properties in the Dominican Republic and Argentina.

History

Atna Resources Ltd. was founded in 1984.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
