Such information creates your awareness about principal trends of Atrinsic, Inc. business.

About Atrinsic, Inc.

Atrinsic, Inc. provides digital advertising and marketing services in the United States. The company has two principal offerings transactional services and subscription services.

Direct-to-Consumer Subscription Services

Subscription services offer its portfolio of subscription based content applications direct to users working with wireless carriers and other distributors.

The company's subscribers principally originate from its performance marketing media network, which includes owned content sites, promotional and sweepstakes sites, email campaigns, social media and, mobile media applications, and an affiliate network. The company can offer mobile phone, land-line, and credit card billing options to its users.

Entertainment Subscriptions: The company bills consumers for this service on a monthly recurring basis through a credit card, land-line, or mobile device. It also offers consumers access to a premium ringtone service through Ringtone.com, which is billed to a users mobile device. Through this service, consumers can download premium ringtones to their mobile device.

Through its interactive contests, the company allows subscribers to win money, prizes and discounts online and through mobile phones. Its casual gaming portfolio captures a wide-range of demographics and interests. The company's primary casual game subscription service, GatorArcade, has a selection of the digital games, including top-rated games Zuma, Diner Dash, and World Series of Poker Pro Challenge. The site also offers arcade games, strategy games, puzzles, and mobile entertainment.

Lifestyles Subscriptions: Through various partnerships, the company has developed a range of subscription-based services and clubs which appeal to various lifestyle interest categories. These services offer consumers access to shopping and entertainment coupons and premium services that can be redeemed online.

Lead Generation and Online Marketing Services (Transactional Services)

Transactional services offers full service online marketing and distribution services which are targeted and measurable online campaigns and programs for marketing partners, corporate advertisers, or their agencies, generating qualified customer leads, online responses and activities, or brand recognition.

The company's online marketing services and lead generation offering gives corporate clients and advertisers access to a suite of direct marketing services from a company with Internet-based direct marketing experience.

Online and Search Marketing Services: The company develops and manage search engine marketing campaigns for its third party advertising clients, as well as for its own proprietary Web sites, promotions and offers. For its own products, it employs the same search marketing and optimization strategies that it deploys on behalf of advertisers, providing scalable search strategies, including organic and paid search campaigns. The company also performs search engine optimization services, for which advertising clients are billed monthly.

The company also offers advertisers additional online marketing services, including a display media platform, online and business intelligence, and brand protection. It provides advertisers with brand protection to mount an optimal defense against online risks to an advertiser's brand.

Lead Generation: The company invests heavily in driving traffic to its network. Its sites feature music content, games, sweepstakes, and loyalty programs. The Atrinsic performance marketing network also includes multiple email programs, which allows it

to use collected data for emailing advertiser offers or for its own direct to consumer offers.

History

The company was founded in 2005. It was formerly known as New Motion, Inc. and changed its name to Atrinsic, Inc. in 2009.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
