Abstracts

Automatic Data Processing, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Automatic Data Processing, Inc. and its competitors. This provides our Clients with a clear understanding of Automatic Data Processing, Inc. position in the [Software and Technology Services](#) Industry.

The report contains detailed information about Automatic Data Processing, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Automatic Data Processing, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Automatic Data Processing, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Automatic Data Processing, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Automatic Data Processing, Inc. business.

About Automatic Data Processing, Inc.

Automatic Data Processing, Inc. provides technology-based outsourcing solutions to employers, vehicle retailers, and manufacturers.

Segments

The company's segments include Employer Services, Professional Employer Organization Services (PEO), and Dealer Services.

Employer Services

This segment offers a range of HR information, payroll processing, tax and benefits administration solutions and services, including traditional and Web-based outsourcing solutions, that assist employers in the United States, Canada, Europe, South America (primarily Brazil), Australia, and Asia to staff, manage, pay, and retain their employees. As of June 30, 2010, Employer Services assisted approximately 520,000 employers with approximately 614,000 payrolls.

United States

This segment consists of various market-facing groups, including small business services (SBS) (serving primarily organizations with approximately 50 employees); major account services (serving primarily organizations with between 50 and 999 employees); and national account services (serving primarily organizations with 1,000 or more employees). In addition, Employer Services' Added Value Services division provides services to clients across all three of these groups.

The company provides payroll services that include the preparation of client employee paychecks, electronic direct deposits, and stored value payroll cards, along with employee pay statements, supporting journals, summaries, and management reports. It also supplies the quarterly and annual social security, medicare and federal, state and local income tax withholding reports required to be filed by employers. The company enables its clients to interface their major enterprise resource planning (ERP) applications with its outsourced payroll services. For those companies that choose to process payroll in-house, the company delivers services, such as payroll tax filing, check printing and distribution, year-end tax statements (Form W-2), wage garnishment services, health and welfare administration and flexible spending account (FSA) administration.

The company offers its integrated comprehensive outsourcing services (COS) solution that allows larger clients to outsource to HR, payroll, payroll administration, employee service center, benefits administration, and time and labor management functions. For mid-sized clients, ADP Workforce Now Comprehensive Services provides integrated tools and technology to support payroll, a full-featured benefits administration solution, HR guidance and HR administration needs from recruitment to retirement. It also offers ADP Resource, an integrated, HR and payroll service offering for smaller clients that provides a menu of optional services, such as 401(k), FSA and a Pay-by-Pay workers' compensation payment program.

The company's Added Value Services division includes various businesses, including tax and financial services, insurance services and tax credit services. These businesses primarily support SBS, major account services and/or national account services, and their services are sold through those businesses, as well as by sales teams and through marketing arrangements with alliance partners.

Tax and Financial Services processes and collects federal, state and local payroll taxes on behalf of, and from, ADP clients and remits these taxes to the appropriate taxing authorities. This business provides an electronic interface between ADP clients and

approximately 7,600 federal, state and local tax agencies in the United States, from the Internal Revenue Service to local governments. Tax and Financial Services is also responsible for the movement of information and funds from clients to third parties through service offerings, such as new hire reporting, TotalPay payroll check (ADPCheck), full service direct deposit (FSDD), stored value payroll card (TotalPay Card), wage verification services, unemployment claims processing, wage garnishment processing, sales and use tax services and its new ADP Procure-to-Pay Solutions, which automates the P2P supply chain and streamlines order, receipt, invoice and payment processes.

Insurance Services provides a

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
