The Avanir Pharmaceuticals financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to

profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Avanir Pharmaceuticals competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Avanir Pharmaceuticals business.

About Avanir Pharmaceuticals

Avanir Pharmaceuticals, Inc., a pharmaceutical company, focuses on developing and commercializing therapeutic products for the treatment of central nervous system disorders.

Drug Candidates and Marketed Products

NUEDEXTA for the treatment of PBA

The company's primary product candidate is NUEDEXTA, a proprietary combination of dextromethorphan/quinidine, which is approved for the treatment of pseudobulbar affect (PBA). NUEDEXTA has also completed a Phase III trial for the treatment of patients with diabetic peripheral neuropathic pain (DPN pain). NUEDEXTA is a combination of 2 components: dextromethorphan hydrobromide (20 mg), the ingredient active in the central nervous system; and quinidine sulfate (10 mg), a metabolic inhibitor enabling therapeutic dextromethorphan concentrations.

AVP-923 for the Treatment of Neuropathic Pain Indications

AVP-923 is for the treatment of diabetic neuropathic pain: The company has completed a Phase III clinical trial for AVP-923 in the treatment of patients with DPN pain. AVP-923 also demonstrated improvements in various key secondary endpoints including the pain relief ratings scale and the pain intensity ratings scale.

AVP-923 for the Treatment of MS Pain: In 2009, the company reported endpoints from the double-blind phase of the AVP-923 STAR trial in pseudobulbar affect (PBA), including an endpoint measuring reduction of pain in patients with underlying multiple sclerosis (MS). AVP-923 30/10 mg demonstrated statistically significant relief of MS-related pain.

Other Programs

Docosanol 10% Cream — Cold Sore Treatment: The company's commercialized product, docosanol 10% cream, is the over-the-counter treatment for cold sores. Its docosanol 10% cream has been approved by regulatory agencies in Asia, North America, and Europe. Its docosanol 10% cream is sold in the United States and Canada as Abreva by its marketing partner GlaxoSmithKline, SB Pharmco Puerto Rico, Inc (GSK).

Competition

The company's competitors include Biovail Corporation; GlaxoSmithKline; and Novartis.

History

Avanir Pharmaceuticals, Inc. was founded in 1988.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
