Abstracts

AVI Biopharma, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between AVI Biopharma, Inc. and its competitors. This provides our Clients with a clear understanding of AVI Biopharma, Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about AVI Biopharma, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for AVI Biopharma, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The AVI Biopharma, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to

profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes AVI Biopharma, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of AVI Biopharma, Inc. business.

About AVI Biopharma, Inc.

AVI BioPharma, Inc., a biopharmaceutical company, engages in the development and commercialization of therapeutic products based upon antisense and cancer immunotherapy technology.

Development Programs

The company's RNA-based drug programs are being clinically evaluated for the treatment of Duchenne Muscular Dystrophy and demonstrated antiviral activity in Ebola, Marburg and H1N1 virus diseases and may prove applicable to other viral targets, such as HCV, Junin, and Dengue viruses.

Duchenne Muscular Dystrophy (DMD) programs: The company develops a series of drugs for the potential treatment of DMD. It has two programs underway with drugs that skip exon 51 (AVI-4658) and exon 50 (AVI-5038) and are identifying lead candidates for exons 44, 45 and 53.

AVI-4658: The company's splice switching oligomer (SSO) drug, AVI-4658, targets the frequent mutations resulting in DMD, forces the genetic machinery to skip over an

adjacent piece (one or more codons) of RNA, thus restoring the ability of the cell to process genetic instructions, thereby, allowing for production of a new, albeit truncated, dystrophin protein. A phase 1 human clinical trial in boys with Duchenne Muscular Dystrophy (DMD) was completed. The company has an ongoing phase 1b/2 systemic clinical trial with this product at the Institute of Child Health in London, the United Kingdom and the University of Newcastle, the United Kingdom.

AVI-5038: AVI-5038 is designed to skip exon 50 and potentially overcome the mutational block and restore dystrophin expression.

AVI-5126 Prevention of Restenosis: AVI partnered with Global Therapeutics, a Cook Medical Company, to evaluate AVI's cardiovascular restenosis drug candidate for use on a chromium cobalt drug-eluting stent (DES) for the treatment of cardiovascular restenosis.

Infectious Disease Programs: The company's infectious disease programs are focusing on single-stranded RNA viruses using its proprietary TSO technology with its PMOplus chemistry backbone to target the often fatal diseases, such as Ebola and Marburg Hemorrhagic Fevers, and H1N1 viruses, as well as other items included on the Department of Homeland Security's list of bioterrorism agents, including Dengue and Junín viruses, anthrax and ricin.

AVI-6002 Ebola virus program: The company demonstrated significant survival in mice, guinea pigs and monkeys when they are treated with AVI-6002 post infection with Ebola virus. In 2008, the company filed an Investigational New Drug application (IND) with the United States Food and Drug Administration (FDA). In 2008, it received approval to move into the initial clinical study.

AVI-6003 Marburg virus program: The company demonstrated significant survival in mice, guinea pigs, and monkeys when they are treated with AVI-6003 post-infection with Marburg virus. In 2008, it filed an Investigational New Drug application (IND) with the FDA. In 2008, the company received approval to move into the initial clinical study.

AVI-7367 H1N1 virus program: Pandemic H1N1 virus, also known as H1N1 or swine origin influenza virus, is often treated with the standard of care drug oseltamivir, also known as Tamiflu.

Strategic Alliances and Other Agreements

Isis — Ercole Agreement: Ercole Biotech and Isis Pharmaceuticals entered into a collaboration and license agreement related to RNA splicing. This agreement established a cross-license between the parties granting each party certain rights under a selected set of the other parties' patents and patent applications for the research, development, and commercialization of antisense therapeutics using RNA splicing. The agreement also established that certain gene targets become exclusive to each party under and during the term of the agreement.

Chiron Agreement: The company has an agreement with Chiron Corporation that granted it a license to Chiron's patents and patent applications for research, development, and commercialization of antisense therapeutics against hepatitis C virus (HCV).

Cook Group Agreement: The company has an agreements with Cook Group Incorporated (Cook) for the development and commercialization of products for vascular diseases. Cook is a designer, manufacturer, and global distributor of minimally invasive medical device technologies for diagnostic and therapeutic procedures. Pursuant to its agreements, Cook licensed AVI-5126 for down-regulating c-Myc expression in the field of cardiovascular disease. Cook has taken over the clinical development of device-related programs for cardiovascular restenosis, including its AVI-5126 drug-eluting stent (DES) program, Resten-MP microparticle delivery program, and a program for catheter delivery of Resten-NG.

Eleos Agreement: The company has a cross-license agreement with Eleos Inc. (Eleos) for the development of antisense drugs targeting p53, a well-studied human protein that controls cellular response to genetic damage. Under the terms of the agreement, AVI granted Eleos a license to AVI's NeuGene third-generation antisense chemistry to treat cancer with p53-related drugs. In return, Eleos granted a license to its patents to AVI for treatment of most viral diseases with drugs that target p53.

Competition

Competitors with respect to the company's RNA-based technologies include Alnylam Pharmaceuticals, Isis Pharmaceuticals, and Santaris. Competitors with respect to its Duchenne muscular dystrophy (DMD) program include Prosensa and GlaxoSmithKline (GSK), and BioMarin Pharmaceuticals.

History

AVI BioPharma, Inc. was founded in 1980.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
