The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Baeta Corp. business.

About Baeta Corp.

Baeta Corp., a technology-enabled health improvement company, engages in empowering patients to elevate their role in the prevention, diagnosis, treatment, and recovery from illnesses. The company develops healthcare information solutions for use by patients and healthcare professionals.

The company's main product is a pain management and assessment product targeted for the chronic pain sufferers in the United States. It designs and develops a line of products for monitoring, reporting, and recording of pain in hospital and outpatient settings. The line of products consists of a hospital-based Pain Monitoring System and an outpatient MyPainAway Pain Tracking System marketed as a consumer product. Additionally, the company is in the process of developing MyPillsOnTime, an automatic medication reminder/dispenser system for consumer market, as well as a commercial version of MyPainAway, for use in the hospital and healthcare facility market.

Products and Services

MyPainAway Pain Tracking System

This handheld consumer device allows patients and sufferers of chronic and acute pain, to track real-time pain onset, breakthrough and therapeutic pain intervention responses

through a handheld device. The data collected by the MyPainAway Pain Tracking System device is transmitted by the patient, via standard USB connection, to their personal computer. The patient then sends the data to their medical practitioner. The online system displays daily graphs and charts that clearly display the onset and severity of the patient's pain, as well as the duration of the sensations of pain, and most importantly, the efficacy of the doctor's chosen regimen of therapeutic and/or pharmaceutical intervention. The data allows medical practitioners to clearly understand the efficacy of chosen treatment plans, while also helping to quantify and track pain management protocols. MyPainAway Pain Tracking System gives both patient and physician a clear visual representation of the benefit of a given treatment regimen, that can be analyzed and modified, based upon the patient's response to various treatments.

MyPainAway Pain Tracking System is an individual pain reporting system designed to produce high fidelity representation of temporal evolution of patients' pain. MyPainAway Pain Tracking System allows a patient to record changes in painful distress through a hand-held counter, upload the data to the personal computer through a USB connection, synchronize the data with the Internet Account, view and print Pain Reports Online or Offline.

Additionally, MyPainAway Pain Tracking System allows a health care practitioner to view changes in patients' painful distress through printed Pain Reports. The practitioner may also establish an Online Account to create a Census of patients, add multiple patients to the Census, view and print Pain Reports for selected patients Online or Offline.

Hospital-based Pain Monitoring System

The Hospital-based Pain Monitoring System would allow hospital patients to project the degree of their painful distress to the Health care team in real time. It would alert the Health care team to the need of a Pain Management intervention. The Monitoring System would incorporate all technological elements developed for MyPainAway Pain Tracking System.

MyHealthID Medical Records System

MyHealthID is a solution that shifts the paradigm for access to medical records from the doctor's office to a patient-controlled online repository. Leveraging the latest electronic document management, security, and online technology, MyHealthID enables doctors

to upload patient-requested medical records into their online portal. Patients can then provide selective access to individual documents to other doctors and healthcare practitioners. Patients using MyHealthID can perform the following: obtain and manage copies of their medical records - ensuring availability for new doctors and in emergency medical situations; electronically request their files - eliminating the need for physical visits to the doctor's office or written and mailed/faxed letters; review and maintain a centralized repository of all medical records across all doctors, specialists, and healthcare providers; and manage and provide selective access to files to other doctors, healthcare providers, or family members - speeding information delivery and healthcare management.

MyHealthID can be used by anyone who interacts with a healthcare professional - enabling the patient to maintain their medical history and provide direct access to authorized healthcare providers.

Suppliers

The company's suppliers would include Nu Horizons Electronics, Microchip, Fairchild Semiconductor, Atmel, and Siemens AG.

Competition

The company's competitors are GE Healthcare, HP, Philips, Nihon Kohden, Datascope, and Spacelabs.

History

BAETA Corp. was founded in 2007.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
