Such information creates your awareness about principal trends of Bajaj Auto Ltd. business.

About Bajaj Auto Ltd.

Bajaj Auto Limited engages in the manufacture and sale of two- and three- wheelers in India. The company also has operations in Latin America, Africa, Middle East, South and South East Asia.

The company's vehicle manufacturing capacity is approximately 3.96 million units — comprising 3.6 million two-wheelers and 360,000 three-wheelers. Its new plant at Pantnagar (Uttarakhand, India) has a capacity to produce 900,000 two-wheelers. Bajaj Auto has offices in Monterrey (Mexico), Dubai and Colombo (Sri Lanka) in addition to its subsidiary PT BAI in Indonesia.

The company has a separate channel for distribution of spare parts. The channel has 73 distributors, who serve directly to approximately 15,000 retail shops across the country.

Subsidiaries

Bajaj Auto International Holdings BV (BAIH BV)

A 100% Netherlands based subsidiary of Bajaj Auto (Bajaj Auto International Holdings

BV) was formed to focus on international ventures. In 2007-08, BAIH BV acquired a 24.45% equity stake in KTM Power Sports AG of Austria, a manufacturer of sport motorcycles in Europe. It offers products, such as Motocross, Supermoto, Enduro and onroad bike products like the Super Duke, and KTM.

PT Bajaj Indonesia (PT BAI)

Bajaj Auto holds 97.5% shares in PT BAI, with the balance being held by the local partner. The subsidiary assembles and markets Pulsars in Indonesia. During 2008-09, the XCD was also launched through PT BAI.

Strategic Alliances

Bajaj Auto Ltd. has collaborated with MotoCzysz LLC. The collaboration is aimed at forming a joint venture named 'Dream' project. The project intends to uncover and explore the possibilities of the next generation automobile.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
