Abstracts

Balqon Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Balqon Corporation and its competitors. This provides our Clients with a clear understanding of Balqon Corporation position in the [Heavy Machinery](#) Industry.

The report contains detailed information about Balqon Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Balqon Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Balqon Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Balqon Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Balqon Corporation business.

About Balqon Corporation

Balqon Corporation engages in the design, assembly, and marketing of zero-emissions heavy-duty electric vehicles for use in the transportation of containers and heavy loads at facilities, such as marine terminals, rail yards, industrial warehouses, intermodal facilities, military bases, and industrial plants.

The company sells its heavy-duty electric vehicles for use at the Port of Los Angeles and has also sold a heavy-duty electric vehicle for use in a demonstration program to the California South Coast Air Quality Management District (AQMD). The company also designs, assembles, and markets components for electric vehicles, including flux vector motor controllers, electric drive systems and battery modules to original equipment manufacturers of automotive products.

Products

Heavy-Duty Electric Vehicles

The company's product line of zero emissions heavy-duty electric vehicles named Nautilus product consists of two product configurations, its on-highway product, the Nautilus XE30, and its off-highway product, the Nautilus XE20. The company also has

developed a heavy-duty electric truck, the Mule M150., which is an on-highway delivery truck targeting inner city delivery applications.

Nautilus XE20 – Electric Yard Tractor: The Nautilus XE20 is a zero emissions heavy-duty short wheelbase electric yard tractor designed for in-terminal operations to transport containers at shipyards, rail yards, intermodal facilities, industrial plants, distribution warehouses, food production facilities, military bases, and mail facilities. The Nautilus XE20 can tow 30 tons cargo containers at a speed of up to 25 miles per hour with a range of 95 miles on a single battery charge under unloaded conditions. In February 2010, the company completed 8 weeks of cold weather testing on its Nautilus XE20.

Nautilus XE30 – Electric Short-haul Tractor: The company's Nautilus XE30 is an on-road-electric Class 8 heavy-duty tractor that is designed for short-haul on-road applications designed to transport trailers and containers at ports and in inner city applications. The Nautilus XE30 is equipped with lithium-ion batteries and its proprietary heavy-duty drive system and is capable of hauling up to 30 tons of loads at speeds of 55 miles per hour with a range of 150 miles on a single battery charge under unloaded conditions. The Nautilus XE30 incorporates proprietary heavy-duty electric drive system into an Autocar Xpeditor chassis is equipped with tandem axles.

Mule M150 – Electric Truck: In 2009, the company released its on-highway heavy-duty electric truck, the Mule M150, designed as a zero emissions solution for short-haul on-highway routes in inner cities, port facilities and airports for the distribution of goods and cargo. The company's Mule M150 is able to travel at a speed of up to 55 miles per hour and has a range of 150 miles on a single charge under unloaded conditions.

Heavy-Duty Electric Drive Systems

The company's integrated electric drive systems have been designed and developed with a use in existing vehicle platforms in electric buses, industrial forklifts, medium duty electric trucks and delivery vans.

Flux Vector Motor Controllers

The company's proprietary variable flux vector motor controllers range in power from 40 kW to 240 kW. The company's flux vector motor controllers available in liquid cooled or air cooled versions depending on the application, duty cycle, and power requirements. The company designs, manufactures, assembles and tests its motor controllers at its

Harbor City facility. The company has designed its motor controllers for high-vibration mobile applications, which include a wash down enclosure design that allows the motor controller to be used in outdoor rugged mobile applications. The company's below 100 kW motor controllers are available in air cooled versions and are used in industrial vehicles, light duty pickup trucks, and recreational vehicles. The company's heavy-duty motor controllers include a liquid cooling system, are made for use in heavy-duty electric vehicles, such as electric tractors, forklifts, buses, delivery vans, Class 4-6 cargo trucks, and mining vehicles.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
