Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Banco Bradesco S.A. business.

About Banco Bradesco S.A.

Banco Bradesco S.A. operates as a private-sector bank in Brazil. The company offers a range of banking and financial products and services in Brazil. Its services and products encompass banking operations, such as lending and deposit-taking, credit card issuance, consortiums, insurance, leasing, payment collection and processing, pension plans, asset management, and brokerage services.

The company organizes its operations into two main areas, including banking services; and insurance services, private pension plans, and certificated savings plans.

BANKING ACTIVITIES

The company offers a range of banking products and services, including deposit-taking operations, such as checking accounts, savings accounts and time deposits; credit operations (individuals and companies, real estate financing, microcredit, onlending of BNDES resources, rural credit, leasing, among others); credit cards, debit cards, and pre?paid cards; management of receipts, payments, human resources, and administrative support; asset management; services related to capital markets and investment banking activities; intermediation and trading services; custody, depository and controllership services; international banking services; and consortiums. The

company's client base includes individuals and small, midsized and large companies in Brazil.

Deposit-taking activities

The company offers various deposit products and services to its customers through its branches, including checking accounts, which do not bear interest; investment deposit accounts; traditional savings accounts; time deposits, which are represented by certificados de deposito bancario (Bank Deposit Certificates, or 'CDBs'), and earn interest at a fixed or floating rate; and deposits from financial institutions, which are represented by certificados de deposito interbancario (Interbank Deposit Certificates, or CDIs), and earn the interbank deposit rate.

As of December 31, 2009, the company had 20.9 million checking account holders, 19.7 million of which were individual account holders and 1.2 million of which were corporate account holders. It had 37.7 million savings accounts.

The company offers its clients some additional special services, such as the 'Easy-Checking Account,' a combination checking account and savings account in which, after the lapse of a pre-set period (the length of which is determined by regulation), deposited funds earn interest at the same rate as its savings accounts, unlike its ordinary checking accounts, which earn no interest; 'identified deposits,' which allow its clients to identify deposits made in favor of a third party through the use of a personal identification number; and real-time 'banking transfers' from a checking, savings or investment account to or between another checking, savings or investment accounts, including accounts at other banks.

Consumer Credit Operations

The company provides personal loans to individual customers. Such loans consist primarily of short-term loans, extended by its branches to holders of its checking accounts and, with in certain limits, through its ATM network; automobile financing loans, which have an average maturity of 15 months; and overdraft loans on checking accounts. The company also provides revolving credit facilities and traditional term loans.

Banco Bradesco Financiamentos (Bradesco Financiamentos) the company's financing subsidiary has two business lines, including payroll deductible loans to INSS retirees and pensioners, employees of companies controlled by federal, state and municipal

governments, and employees of private sector companies; and financing and leasing of vehicles with solutions in CDC, leasing and others with its own funds, as well as onlending to Bradesco clients and non?clients, working in partnership with 22,639 resellers and dealers across the country in the segments of light vehicles, motorcycles, and heavy vehicles.

The company operates with correspondent banks in all Brazilian states, which also offer value added products (credit cards, insurance, funding, consortium and others) and operate in partnership with Bradesco branches to directly

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
