In the part that describes Bandar Raya Developments Bhd competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Bandar Raya Developments Bhd business.

## **About Bandar Raya Developments Bhd**

Bandar Raya Developments Berhad engages in the property development and investment, as well as in the manufacturing arena, through its subsidiary, Mieco Chipboard Berhad (MIECO) in Malaysia. The company is organized into two main business segments that include property and manufacturing.

### **Segments**

Property segment includes property development, property investment and property management, which includes management and operation of bowling centers, a golf course and sports complex. It develops residential suburbs and townships. Manufacturing segment includes manufacturing and sales of wood based products. Other operations of the company comprise investment holding and investment trading.

### **Subsidiaries**

Permas Jaya Sdn Bhd: Permas Jaya Sdn Bhd began active property development in 1981 of its land bank of 1,392 acres, which started off as a rubber and oil palm estate.

**Capital Square Sdn Bhd:** Capital Square Sdn Bhd is the developer of the CapSquare development, which is strategically located on a 15-acre piece of prime freehold land straddling the Golden Triangle and the Central Business District of Kuala Lumpur. When fully completed, CapSquare would comprise 4 office towers, 4 signature office buildings, 2 high-rise condominium blocks, a retail centre, a 300-metre retail street and a hotel.

**BR Property Holdings Sdn Bhd:** BR Property Holdings Sdn Bhd manages the successful retail landmark, Bangsar Shopping Centre (BSC), located in Bukit Bandar Raya. BSC centre consists of bowling alley, supermarket, theatre, flea market, live music events and day care centre.

**Mieco Chipboard Berhad:** BRDB's manufacturing division is MIECO, a 56.3%-owned subsidiary. MIECO commenced operations in 1976 and initiated the use of rubberwood for the production of chipboard. MIECO's production facilities have a combined annual production capacity of 300,000 cubic meters with approximately half of its output exported to approximately 20 countries.

## History

Bandar Raya Developments Berhad was incorporated in 1964.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
