The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Bank of Kentucky Financial Corp. business.

About Bank of Kentucky Financial Corp.

The Bank of Kentucky Financial Corporation operates as the holding company for The Bank of Kentucky, Inc, which provides consumer and commercial financial services to customers throughout northern Kentucky. The company also offers wealth management and trust services.

The company provides financial service and other financial solutions through 31 offices located in northern Kentucky, which includes Boone, Kenton and Campbell counties and parts of Grant and Gallatin counties in northern Kentucky and also greater Cincinnati, Ohio.

The principal products produced and services rendered by the company are as follows:

Commercial Banking: The company provides a range of commercial banking services to corporations and other business clients. Loans are provided for various general corporate purposes, including financing for commercial and industrial projects, income producing commercial real estate, owner-occupied real estate, and construction and land development. It also provides a range of deposit services, including checking, lockbox services, and other treasury management services.

Consumer Banking: The company provides banking services to consumers, including checking, savings, and money market accounts, as well as certificates of deposits and individual retirement accounts. It also provides consumers with electronic banking products like Internet banking, debit cards, and 47 ATMs. In addition, it provides consumer clients with installment and real estate loans and home equity lines of credit.

Trust Services: The company offers services in the areas of wealth management and trust. These services include the administration of personal trusts and estates, as well as the management of investment accounts for individuals.

Lending Activities

The company's lending activities include the origination of loans secured by first mortgages on nonresidential real estate; loans secured by first mortgages on one- to four-family residences; commercial loans secured by various assets of the borrower; unsecured consumer loans and consumer loans secured by automobiles, boats and recreational vehicles; and construction and land development loans secured by mortgages on the underlying property.

Nonresidential Real Estate Loans: The company makes loans secured by first mortgages on nonresidential real estate, including retail stores, office buildings, warehouses, apartment buildings, and recreational facilities.

Residential Real Estate Loans: The company originates permanent conventional loans secured by first mortgages on single-family and multi-family residential properties located in the northern Kentucky area. It also originates loans for the construction of residential properties and home equity loans secured by second mortgages on residential real estate. Each of such loans is secured by a mortgage on the underlying real estate and improvements thereon, if any. It originates residential real estate loans to be sold, service released, subject to commitment to purchase in the secondary market.

Commercial Loans: The company offers commercial loans to individuals and businesses located throughout northern Kentucky and the metropolitan area. The typical commercial borrower is a small to mid-sized company.

Consumer Loans: The company makes various consumer loans, including automobile loans, recreational vehicle loans, and personal loans.

Construction and Land Development Loans: The company makes loans for the construction of residential and nonresidential real estate and land development purposes. Other loans are made to builders and developers for various projects, including the construction of homes and other buildings that have not been pre-sold and the preparation of land for site and project development.

Municipal Obligations: The company makes loans to various Kentucky municipalities for various purposes, including the construction of municipal buildings and equipment purchases. Loans made to municipalities are secured by mortgages on the properties financed or by a lien on equipment purchased or by the general taxing authority of the municipality and provide certain tax benefits for the company.

Investment Portfolio

As of December 31, 2009, the company's investment portfolio included securities of the U.S. treasuries; U.S. government, federal agency, and government sponsored enterprises; U.S. government mortgage-backed; corporate obligations; and municipal and other obligations.

Deposits

The company offers various deposit instruments, including regular passbook savings accounts, negotiable order of withdrawal (NOW) accounts, money market deposit accounts, term certificate accounts, and individual retirement accounts (IRAs).

History

The Bank of Kentucky Financial Corporation was founded in 1990.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
