The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Bank of Montreal business.

About Bank of Montreal

Bank of Montreal offers credit and non-credit products and services in Canada and internationally.

As of October 31, 2010, the bank maintained approximately 1,230 bank branches in Canada and the United States and operated internationally in major financial markets and trading areas through its offices in 8 other countries, including the United States.

The bank's wholly owned subsidiary, Harris Financial Corp., operates through its indirect subsidiary, Harris N.A., which provides banking, financing, investing, and cash management services in select markets in the U.S. Midwest. The bank provides a range of investment dealer services through the BMO Nesbitt Burns group of companies, which include BMO Nesbitt Burns Inc., an integrated Canadian investment dealer in which it owns 100% of the voting shares, and BMO Capital Markets Corp., its wholly-owned registered securities dealer in the United States.

Operations

The bank operates through three operating groups, Personal and Commercial Banking (P&C) comprising P&C Canada and P&C U.S.; Private Client Group (PCG); and BMO

Capital Markets.

P&C Canada operates across Canada, offering banking, financing, and investing solutions, as well as card and payment services. Operating in the greater-Chicago area under the Harris brand, P&C U.S. provides personal and business clients with banking, lending, investing, and financial planning services.

PCG offers wealth management products and solutions across North America, including full-service investing, private banking, online brokerage, and investment management services through BMO Bank of Montreal, BMO Nesbitt Burns, BMO InvestorLine, BMO Guardian, Jones Heward Investment Counsel, HIM Money, BMO Harris Private Banking, Harris Private Bank, Harris Investment Management, and PymFord International, based in the United Kingdom, as well as insurance products and solutions through BMO Life Insurance and BMO Life Assurance in Canada.

BMO Capital Markets, its investment and corporate banking group, provides a range of capital markets solutions to corporate, institutional, and government clients in Canada, the United States, Europe, Asia, and Australia.

Acquisitions

In December 2009, the bank acquired the Diners Club North American franchise from Citigroup. It has acquired rights to issue Diners Club cards to corporate and professional clients in the United States and Canada.

In April 2010, the bank announced the acquisition of certain assets and liabilities of AMCORE Bank N.A., a Rockford, Illinois-based bank from the Federal Deposit Insurance Corporation (FDIC).

History

Bank of Montreal was founded in 1817.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
