The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Banyan Corp. business.

About Banyan Corp.

Banyan Corporation, through its subsidiaries, engages in diagnostic testing, franchising and licensing Chiropractic USA branded chiropractic clinics. The company provides practice development training and assistance to chiropractors, as well as offers franchise support and related services to franchisees. It also offers diagnostic testing services.

Premier Medical Group: Premier Medical Group is the company's diagnostic testing business, offering Nerve Conduction Velocity (NCV) testing to patients through health care professionals such as doctors and chiropractors, including its chiropractic franchisees. NCV testing measures the transmission of nerve impulses through the body, identifies problems in the nervous system, and helps to substantiate the treatment to patients and their insurers.

Premier Medical Group sets up blocks of patient testing appointments and then arranges for one of its certified neurological technician to bring test equipment to the doctors' offices and perform the scheduled tests. Premier Medical Group performed approximately 6,235 tests in 2007.

Virtual Medical Systems: Virtual Medical Systems is the company's subsidiary that

manufactures and markets the VT3000, a nerve testing system originally developed by Premier Health Services. The company manufactures the system through a third party, Scientific Imaging Inc., located in Atlanta, Georgia, under a supply contract, and market it to physicians and chiropractors through a six-man sales force that is part of Premier Medical Group.

The VT 3000 is a point-of-service solution for the diagnosis of neuropathies, which are diseases of the peripheral nerves and parts of the spine, as well as nerve irritation and other damage to the nervous system of a patient.

Chiropractic USA: There are approximately 80,000 chiropractors in the United States and Canada. Chiropractic USA was formed to develop Chiropractic USA brand chiropractic clinics throughout North America under the Chiropractic USA trademark and uniform operating systems and practices. The company offers licenses to chiropractors as an alternative to franchises.

The company developed its network of franchised clinics through conversion of established practices to franchised Chiropractic USA brand clinic locations and franchising new practitioners.

The company has franchise agreements covering 55 locations. Its franchise agreements provide for payment of percentage royalties, contribution to an advertising fund, and charges for additional services selected by the franchisee.

Competition

The company's competitors include Neurometrix, Inc.; Viasys Healthcare Inc., Cadwell Laboratories, Inc., and Xltex, Inc.

History

Banyan Corporation was founded in 1978.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
