Abstracts

Bavarian Nordic A/S Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Bavarian Nordic A/S and its competitors. This provides our Clients with a clear understanding of Bavarian Nordic A/S position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Bavarian Nordic A/S that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Bavarian Nordic A/S. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Bavarian Nordic A/S financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Bavarian Nordic A/S competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Bavarian Nordic A/S business.

About Bavarian Nordic A/S

Bavarian Nordic A/S, a biotechnology company, engages in the development and production of vaccines for the treatment and prevention of biodefence, cancer, and infectious diseases. It offers products based on its proprietary technology MVA-BN, a multivalent vaccine vector for the development of vaccines against various infectious diseases such as smallpox, HIV/AIDS, as well as against breast and prostate cancer. It has operations in Denmark, Germany, the U.S.A, and Singapore.

Pipeline

Biodefence

IMVAMUNE – smallpox vaccine programme: The company is developing IMVAMUNE as a third-generation smallpox vaccine, which has completed the Phase II clinical trial.

Anthrax: The company has initiated a new development programme for an MVA-BN-based anthrax vaccine. It intends to initiate clinical Phase I studies.

Cancer

PROSTVAC: The company is developing PROSTVAC, a late-stage vaccine candidate. PROSTVAC is a therapeutic vaccine moving into late stage clinical development that has the potential to extend the lives of people with advanced prostate cancer.

MVA-BN-HER2 (breast cancer): The company's therapeutic breast cancer vaccine candidate is based on a HER-2/Neu antigen. The product is being developed as therapy of metastatic breast cancer patients whose tumours over-express HER2 and it combines the MVA-BN technology with an improved form of the HER-2. It is in phase I/II clinical study.

MVA-BN PRO (prostate cancer): The company's MVA-BN-based vaccine candidate for the treatment of prostate cancer is designed to express sequences that induce immunity towards prostate-specific antigen (PSA) and prostatic acid phosphatase (PAP). It is in phase I/II clinical study.

HIV

MVA-BN HIV multiantigen: MVA-BN HIV multiantigen is both a prophylactic and a therapeutic vaccine candidate expressing eight whole or truncated antigens from HIV with the target of eliciting immune response against HIV. It is in Phase I/II safety and immunogenicity study.

Childhood vaccines (measles and RSV): The company intends to conduct a Phase I study with the MVA-BN Measles vaccine in six-month- to six-year old children.

Agreements

The company has a cooperative research and development agreement with National Cancer Institute (NCI) to jointly develop new immunotherapies for the treatment of prostate cancer.

History

Bavarian Nordic A/S was founded in 1994.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to

the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
