Abstracts

Beach Energy Limited Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Beach Energy Limited and its competitors. This provides our Clients with a clear understanding of Beach Energy Limited position in the [Energy](#) Industry.

The report contains detailed information about Beach Energy Limited that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Beach Energy Limited. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Beach Energy Limited financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Beach Energy Limited competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Beach Energy Limited business.

About Beach Energy Limited

Beach Petroleum Limited operates in the oil and gas industry within Australia. The Company holds interests in eight oil and gas producing assets in the Cooper/Eromanga and Otway Basins.

Properties

Cooper/Eromanga Basin

Bodalla Block Oil Fields (Beach 100%)

The Bodalla Block fields comprise the Bodalla South, Kenmore and Black Stump fields located in the Eromanga Basin of southwest Queensland, approximately 900 km west of Brisbane. In 2004 the Company has drilled five wells in the fields. Four wells were drilled in the Kenmore field and one well in the Bodalla South field. Kenmore-31, 32, 33 and 34 commenced production on free flow by February 2005 and were producing at a combined rate of 380 bopd as of June 30, 2005. Bodalla South-15 was drilled during February 2005 in the northern portion of the Bodalla South field and commenced production in March 2005. As of 30 June 2005, the well had produced 72 kbbbls of oil.

Jackson Oil Field (Beach 6.5%)

A two well drilling program was undertaken in the Jackson field. Jackson-44, an oil development well, was drilled in March 2005. Production commenced from the well in May 2005 and as of June 30, 2005, 3,470 barrels of oil had been produced. Jackson-45, an oil appraisal well on the northern flank of the field, was drilled in May/June 2005. The well is expected to commence production.

Selicks Oil Field (Beach 75%)

As of June 30, 2005, cumulative production had reached 230 kbbbls. An appraisal well is planned for 2006.

Christies Oil Field (Beach 75%)

The Company has drilled 2 appraisal wells during August/September 2004. Christies-2 & 3 commenced production in October 2004 and produced 260 kbbbls of oil, as of June 30, 2005. As of June 30, 2005, the wells were producing at a combined rate of approximately 1,000 bopd.

Acrasia Oil Field (Beach 25%)

Subsequent to June 30, 2005, Acrasia-4, a development well targeting the Hutton Sandstone, was drilled. The well was cased and completed for future production.

Aldinga-1 (Beach 50%)

In 2004, Aldinga-1 produced with the production rate stabilising approximately 25-30 bopd with minimal water. Further drilling on the Aldinga structure is being considered.

Harpoono-1 (Beach 33.3%)

Harpoono-1, drilled in May/June 2004, discovered oil in the Murta Formation and commenced production in November 2004. As of June, 30, 2005, the well was producing at a rate of 100 bopd. Cumulative production was 14 kbbbls.

Exploration Drilling

As of June 30, 2005, five exploration wells were drilled, resulting in one commercial oil

discovery. Coolum-1 (ATP 269P Coolum Block, Beach 46.95%), 11 km southwest of the Kenmore oil field and 0.5 km north of the Glenvale-1 oil well, was drilled during February 2005 and discovered oil in the Westbourne Formation. The well was cased and completed. Production commenced in July 2005 at a rate of 30 bopd on free flow.

ATP 633P

The Company is negotiating with the Wangkumarra Native Title claimants on a Right to Negotiate Agreement. Following execution of this agreement, it is anticipated the exploration activities would commence during 2006.

Otway Basin

Beach entered into a farmin arrangement with Essential Petroleum Resources Limited in relation to VIC/P46, in the Victorian offshore Otway Basin, under which Beach would earn a 17.5% interest in that tenement. As of June 30, 2005, no drilling was carried out.

During the period ended June 30, 2005, Beach diluted its interest in PEL 27, in the South Australian onshore Otway Basin, from 50% to 30%. Beach would test an oil prospect located approximately 25 km northwest of Penola.

Beach reached an agreement with Santos Limited and Origin Energy Resources Limited under which it would acquire a 50% interest in PEP 160, an exploration tenement located in the onshore Otway Basin in western Victoria. This well would be drilled in 2006 to test the gas potential of the Pretty Hill Sandstone in a prospect located approximately 30 km to the southeast of Penola.

Gippsland Basin

In October 2004, Beach acquired a 25% interest in VIC/RLs 6, 9 & 10, containing the Basker, Manta and Gummy oil and gas fields in the Gippsland Basin,

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
