Abstracts

Belden, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Belden, Inc. and its competitors. This provides our Clients with a clear understanding of Belden, Inc. position in the [Electrical Equipment](#) Industry.

The report contains detailed information about Belden, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Belden, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Belden, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Belden, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Belden, Inc. business.

About Belden, Inc.

Belden, Inc. engages in the design, manufacture, and marketing of cable, connectivity, and networking products in markets, including industrial automation, enterprise, transportation, infrastructure, and consumer electronics.

Segments

The company's segments include the Americas segment, the Europe, Middle East, and Africa (EMEA) segment, the Asia Pacific segment, and the Wireless segment.

Markets and Products, Americas Segment

The Americas segment designs, manufactures, and markets various product types, including cables, Ethernet switches, and industrial connectivity for use in various principal markets, including industrial; audio and video; security; networking; and communications. The segment also designs, manufactures, and markets connectivity, cable management products, and cabinetry for the enterprise market.

For this segment, the company defines the industrial market to include applications ranging from industrial networking and robotics to traditional instrumentation and control systems. Its cable products are used in discrete manufacturing and process operations

involving the connection of computers, programmable controllers, robots, operator interfaces, motor drives, sensors, printers, and other devices. Many industrial environments, such as petrochemical and other harsh-environment operations, require cables with exterior armor or jacketing that can endure physical abuse and exposure to chemicals, extreme temperatures, and outside elements. Other applications require conductors, insulating, and jacketing materials that can withstand repeated flexing. In addition to cable product configurations for these applications, the company supplies heat-shrinkable tubing and wire management products to protect and organize wire and cable assemblies. It sells its industrial products primarily through value-added resellers, industrial distributors, and original equipment manufacturers (OEMs).

The company manufactures various multiconductor and coaxial products, which distribute audio and video signals for use in broadcast television (including digital television and high definition television), broadcast radio, pre- and post-production facilities, recording studios, and public facilities such as casinos, arenas, and stadiums. Its audio/video cables are also used in connection with microphones, musical instruments, audio mixing consoles, effects equipment, speakers, paging systems, and consumer audio products. The company's primary market channels for these broadcast, music, and entertainment products are broadcast specialty distributors and audio systems installers. The Americas segment also sells directly to music OEMs and the major networks including ABC, CBS, Fox, and NBC.

The company provides specialized cables for security applications such as video surveillance systems, airport baggage screening, building access control, motion detection, public address systems, and advanced fire alarm systems. These products are sold primarily through distributors and also directly to specialty system integrators.

In the networking market, the company supplies structured cabling solutions for the electronic and optical transmission of data, voice, and video over local and wide area networks. End-use applications are hospitals, financial institutions, government, service providers, transportation, data centers, manufacturing, industrial, education, and enterprise customers. Products for this market include copper cables (including 10-gigabit Ethernet technologies over copper), fiber optic cables, connectors, wiring racks, panels, interconnecting hardware, intelligent patching devices, and cable management solutions for network structured wiring systems. Its systems are installed through a network of highly trained system integrators and are supplied through authorized distributors.

In the communications market, the company manufactures copper-clad coaxial cable for

high-speed transmission of voice, data, and video (broadband), used for the drop section of cable television (CATV) systems and satellite direct broadcast systems. These cables are sold primarily through distributors.

Markets and Products, EME

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
