Abstracts

Benchmark Electronics Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Benchmark Electronics Inc. and its competitors. This provides our Clients with a clear understanding of Benchmark Electronics Inc. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Benchmark Electronics Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Benchmark Electronics Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Benchmark Electronics Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Benchmark Electronics Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Benchmark Electronics Inc. business.

About Benchmark Electronics Inc.

Benchmark Electronics, Inc. provides integrated electronic manufacturing services. The company provides its services to original equipment manufacturers (OEMs) of computers and related products for business enterprises, medical devices, industrial control equipment, testing and instrumentation products, and telecommunication equipment.

The company's services are referred to as electronics manufacturing services (EMS). It offers its customers integrated design and manufacturing services, from initial product design to volume production and direct order fulfillment. It also provides precision machining, metal joining and complex electro-mechanical manufacturing services. The company also provides specialized engineering services, including product design, software development, industrial design, assembly automation, printed circuit board layout, prototyping, and test development.

Services

The company offers a range of engineering, automation, test, manufacturing, and fulfillment solutions that support its customers' products from initial design through

prototyping, design validation, testing, ramp to volume production, worldwide distribution, and aftermarket support.

Engineering Solutions

New Product Design, Prototype, Test, and Related Engineering Solutions: The company offers a spectrum of new product design, prototype, test, and related engineering solutions. Its multi-disciplined engineering teams provide expertise in various core competencies critical to serving original equipment manufacturers (OEMs) in its target markets, including industrial design, mechanical and electrical hardware, firmware, software, and systems integration and support.

Custom Test and Automation Equipment Design and Build Solutions: The company provides its customers with a range of custom automated test equipment, functional test equipment, process automation, and replication solutions. It has knowledge in tooling, testers, equipment control, systems planning, automation, floor control, systems integration, replication, and programming. The company's custom functional test equipment, process automation, and replication solutions are available to its customers as part of its full service product design and manufacturing solutions package or on a stand-alone basis for products designed and manufactured elsewhere. The company also provides custom test equipment and automation system solutions to OEMs.

Manufacturing and Fulfillment Solutions

Printed Circuit Board Assembly & Test: The company offers a range of printed circuit board assembly and test solutions, including printed circuit board assembly, assembly of subsystems, circuitry and functionality testing of printed assemblies, environmental and stress testing, and component reliability testing.

Flex Circuit Assembly & Test: The company provides its customers with a range of flex circuit assembly and test solutions. It utilizes specialized tooling strategies and automation procedures to minimize circuit handling.

Systems Assembly & Test: The company works with its customers to develop product-specific test strategies. Its test capabilities include manufacturing defect analysis, in-circuit tests to test the circuitry of the board and functional tests to confirm that the board or assembly operates in accordance with its final design and manufacturing specifications. In addition, the company provides environmental stress tests of assemblies of boards or systems.

The company also offers precision and electromechanical technologies and optical manufacturing services. To meet its customers' demand for systems assembly and test solutions, the company offers subassembly build, final assembly, functionality testing, configuration and software installation, and final packaging services.

Precision Electromechanical Assembly and Test: The company offers a spectrum of precision subsystem and system integration services. These services include assembly, configuration and test of complex computers and related products for business enterprises, medical devices, industrial control equipment, testing and instrumentation products, and telecommunication equipment. The company d

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
