Abstracts

Beta Systems Software AG Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Beta Systems Software AG and its competitors. This provides our Clients with a clear understanding of Beta Systems Software AG position in the [Software and Technology Services](#) Industry.

The report contains detailed information about Beta Systems Software AG that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Beta Systems Software AG. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Beta Systems Software AG financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Beta Systems Software AG competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Beta Systems Software AG business.

About Beta Systems Software AG

Beta Systems Software AG develops software products and solutions for the automated processing of large volumes of data and documents. The company, with approximately 3,000 running installations, has a customer base of 1,300 companies from the sectors of financial services, IT service providers.

Document Processing

Document Processing includes Capture, processing, provisioning, distribution and archiving of business-critical information. The company is an ECM provider for financial services and offers products for incoming mail, paper-based payment transactions and archiving/workflow solutions.

Beta Agilizer 4 Document Processing provides document based solutions and connects business processes to documents. This facilitates searching and retrieval of electronically archived documents, irrespective of the archive system holding them. The Agilizer can integrate any archive solution and makes the documents available for processing through Web services and additional user- and business process oriented interfaces.

Data Processing

The company offers products, consulting and operational support for company-wide data center activities as a one-stop service. There are approximately 1,000 international customer installations for data center automation. Its enterprise concept allows even distributed platforms of heterogeneous IT landscapes to use from centralized data center operations. The storage products from Beta Systems are used to store and manage data, while its output management products provide tools for the automatic processing and distribution of bulk document streams in the data center.

Beta Agilizer 4 Data Processing is an integration platform for a variety of DC automation products and tools. It allows administrators to centrally address output management, scheduling, workload management and other DC tasks across the entire solution.

Security

The Beta Systems security product portfolio enables the automation of all key IT user management processes. The company's technology implements a rule- and role-based administration concept that supports transparent administration up to the business process level. The platform-independent SAM Identity Management Suite comprises provisioning, administration, password management, compliance and infrastructure products.

The Beta Agilizer 4 Security solution provides a platform for integrating all identity management aspects. Administration and provisioning services can be integrated in existing portals, workflows and SOA platforms. The Agilizer also includes identity and system audit features and integrates with the Beta compliance products, enabling cross-division and company-wide identity management and providing a central integration platform for IdM solutions in large corporations.

Compliance

Comprehensive management of legal provisions: The company's compliance products help customers enforce companywide policies and comply with legal and commercial requirements on a national and international level. Products such as Beta 92, Beta 93 - Document Transformer, Beta 88 zSecurity Auditor and Beta 96 Enterprise Compliance Auditor form part of Beta Systems' solution portfolio for the specialized storage, evaluation and processing of existing information in accordance with all policies in

effect.

Beta Agilizer 4 Compliance is a product that allows customers to plan and carry out their compliance management processes in a central and automated manner across the entire company.

History

Beta Systems Software AG was founded in 1983.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
