Abstracts

Beyonics Technology Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Beyonics Technology Ltd. and its competitors. This provides our Clients with a clear understanding of Beyonics Technology Ltd. position in the [Computers and Electronic Equipment](#) Industry.

The report contains detailed information about Beyonics Technology Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Beyonics Technology Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Beyonics Technology Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Beyonics Technology Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Beyonics Technology Ltd. business.

About Beyonics Technology Ltd.

Beyonics Technology Limited provides contract manufacturing services to original equipment manufacturers (OEMs) in computer storage devices, medical devices and electronics communication products. The company also manufactures precision machining parts for the hard disk drive, electronics, and automotive industry.

The company's contract manufacturing services include printed circuit board assembly, turnkey system assembly, testing, packing and distribution, manufacturing of plastics injection mould parts and precision stamping parts. The precision machining services include the design and fabrication of tools, die casting and precision machining. The company principally operates in United States of America, Thailand, China, Mauritius, Indonesia, Singapore, and Malaysia.

DIVISIONS

The company operates in four divisions: contract manufacturing division, plastics injection molding division, precision metal stampings division, and precision engineering division.

Electronics Manufacturing Services (EMS)/Contract Manufacturing Division

Beyonics offers EMS solutions to customers looking to outsource their manufacturing operations. Its EMS Solutions include: design and engineering services; prototyping; PCBA facilities, such as surface mount technology (SMT), plated through hole (PTH), and mixed technology; BGA, CSP, and flip chip assembly; clean and no-clean processes for PCBA; in-circuit & functional tests / burn-in tests; system test; class 100 & 1000 clean rooms; dedicated mechanical assembly team; Box Build capability to handle turnkey projects all the way from component and material sourcing to logistical distribution; vertically integrated manufacturing support from beyonics complementary business divisions; -design engineering, plastics moulding, metal stamping, die-casting, precision machining; and repair services

Data Storage Market: The company's product offerings in the data storage market include - HDD PCBA, Tape Drive, and Box Build. Its customers in this market include Seagate, Quantum, and Dell.

Computer/IT Market: The company's product offerings in the computer/IT market include - Printer, PC Video, and TFT Monitor. Its customers in this market include HP, Hauppauge, and AE/IKor.

Medical Market: The company's product offerings in the medical market include - Infusion pump, Safety Syringe, and Insulin Cartridge. Its customers in this market include Baxter, Medisys, Aminos, and JMS.

Automotive Market: The company's principal product in the automotive market is Sensors. Its principal customer in this market is Texas Instruments.

Electronic Payments and Banking Market: The company's product offerings in the electronic payments and banking market include Point of sale display and Printers. Its customers in this market segment are IBM and Moneyline.

Telecommunication Market: The company's principal product offering in the telecommunication market is Cordless Telephone. Its principal customer in this market is Panasonic.

Consumer Market: The company's principal product offering in the consumer market is Audio/Video. Its customers in this market are Panasonic, Sony, and Hitachi.

Plastic Molding Division

The company's plastic division supplies plastic components and finished products to global customers in the medical, automotive, optics, and electronics industry.

The company's plastic molding services include: product design support; mold design and fabrication; molding of engineering plastics, including 2-color molding, stack molding, fully automated insert molding, clean-room molding; secondary and finishing operations; mechanical sub-assembly, including fully auto machine, metal part support (stamping), electronic support (PCBA); and material management, including stamping – resin and PCBA - metal insert.

Information Technology Market: The company's principal product offerings in the information technology market include printers, copier, electronic components, computers. Its customers in this market segment include Hewlett Packard, Flextronics, Solectron, Xerox, FCI, and Venture Mfg.

Industrial Equipment Market: The company's principal product offering in the industr

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3×3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
