The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of BG Group plc business.

## **About BG Group plc**

BG Group plc operates in the energy sector, focusing on natural gas. It has interests in 27 countries across five continents. The company is engaged in the exploration, development, production, transmission, distribution and supply of natural gas. It also has power generation business interests.

### Segments

The company operates in four business sectors – Exploration and Production, Liquefied Natural Gas, Transmission and Distribution, and Power.

**Exploration and Production:** The company explores for, develops, produces and markets gas and oil around the world.

**Liquefied Natural Gas (LNG):** BG Group's LNG activities combine liquefaction and regasification facilities with the purchasing, shipping, marketing and sale of LNG.

**Transmission and Distribution:** BG Group's T&D activities are focused in various markets, developing both markets and infrastructure for the delivery of gas.

Power Generation: The company develops, owns and operates gas-fired power generation plants.

### Significant Events

On June 30, 2009, EXCO Resources Inc. announced that it has reached a definitive agreement with BG Group plc for the joint development and operation of EXCO's Haynesville shale and certain other related natural gas assets located in East Texas/North Louisiana. In addition, EXCO and BG Group have reached an agreement in principle regarding the joint development and operation of EXCO's midstream assets in East Texas/North Louisiana.

The company and EXCO Resources Inc. are jointly developing and operating EXCO's Haynesville shale and certain other related natural gas assets located in East Texas/North Louisiana, and EXCO's midstream assets in the same area.

In November 2009, Petroleo Brasileiro has formalized with the BG Group plc, the incorporation of a joint venture to develop the FEED (Front End Engineering and Design) aiming to build an onboard natural gas liquefaction unit (ONGU).

In March 2010, CNOOC Ltd. and BG Group PLC have signed a 20-year deal for the production in Australia and sale of liquefied natural gas.

In April 2010, BG Group plc and partners, Petroleo Brasileiro and Galp Energia SGPS SA have completed drilling a Tupi field appraisal well (3-RJS-666) in the BM-S-11 licence area, Santos Basin pre-salt, offshore Brazil.

In June 2010, Repsol YPF SA and its partners BG Group plc and Pan American Energy LLC signed an agreement to install a natural gas processing plant at the Margarita field in the Caipipendi Block in southern Bolivia.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
